

# *Algebraic Number Theory*

edited by

**Cassels and Fröhlich**

First printed in 1967, this book has become a classic and includes landmark contributions from Serre and Tate. It has been out of print for some years. In 2009, we discovered that the London Mathematical Society holds the publishing rights and we are currently seeking final permissions

with the contributors. We plan to reprint the book in Spring 2010 as a unique publication. It will be available for sale through Amazon, Barnes & Noble and other major online booksellers.
