The London Mathematical Society expects to award 10-15 mobility grants to young mathematicians of excellent promise. These grants are to support a period of study and research in mathematics at one or more institutions other than the holder’s home institution*.

*(The grant holder's home institution may be included for applicants with circumstances that make moving impractical – please see the website for the guidelines.)

These grants have been established by the LMS to mark its 150th Anniversary.

Application deadline: Tuesday 31 March 2015   Application form: http://www.lms.ac.uk/grants
