

London Mathematical Society

Report for the Trustees for the period

1 August 2020 – 31 July 2021

LONDON
MATHEMATICAL
SOCIETY

INTRODUCTION

While the pandemic has continued to have a profound impact on the Society this year, it has also obliged us to find new and creative ways of pursuing the Society's charitable objectives. We have, amongst many other things, launched new grants, run numerous online meetings and events, participated virtually in major international conferences and successfully developed an on-line A-level mathematics tutoring programme.

We are now, we hope, entering a period of rebuilding following the pandemic. But we also want to carry forward the lessons we have learnt about new ways of working. For example, we now know that online and hybrid online/in person meetings can be effective and make better use of everyone's time. They are also cheaper, more inclusive and more environmentally friendly. This year, the Society adopted an environmental policy statement and the Society's Council has made it clear that the Society should be a leader in the mathematics community in relation to sustainability.

We are also pleased that we have been able to launch new areas of activity during the pandemic. With the generous support of Dr Tony Hill, and in conjunction with Durham University and the University of Leicester, we have launched the Levelling Up tutoring programme for A-level mathematics students from under-represented backgrounds. We helped plan and deliver the first 'Black Heroes of Mathematics' conference in conjunction with the Institute of Mathematics and its Applications and the British Society for the History of Mathematics. This conference was held online and our aim is that this will be a regular event. We are delighted that another 'Black Heroes of Mathematics' conference is already scheduled for the coming year.

We have extended existing grant schemes, and developed new grant schemes, to help the mathematical community deal with the impact of the pandemic. This includes awarding extra Early Career Fellowships, offering additional funding to Research Groups for producing online lectures and creating our Research Reboot grants to allow individual researchers to focus again on their research. We've also tried to help the community in other practical ways, such as by extending the deadline for nominations for our prizes at the start of the year, and by developing a list of other non-LMS sources of funding on our website.

This year has seen a major programme of work to renew the Society's contracts for publication of our

core journals and one of our partner journals. This work has confirmed that the academic publishing market is being transformed by the drive towards open access. As a result, the Society must now adapt to significant changes in our income from our publishing activities. While expenditure has also reduced during the pandemic, with fewer in person events and less travel, we are going to have to keep managing our finances closely going forwards. The pandemic has forced us to identify and focus on our priorities, which will help us greatly as we adjust to our new financial situation.

Over the course of its history, the Society has benefited from a number of very generous donations and we are delighted and grateful that this continues today. Among a number of significant gifts from donors this year, AEL Davies, a long time Member and supporter of the Society, has bequeathed to the Society her copy of the rare book of astronomical tables *Urania Propitia* by Maria Cunitz. *Urania Propitia* was published in 1650 and fewer than 25 physical copies are known to exist. The Society was also recognised this year by the Bank of England for its assistance in the development of the new £50 Alan Turing banknote, which went into circulation in June. The Bank of England presented the Society with one of the new banknotes from its first manufacturing run. The Society's note has a low serial number of AA01 001936, referencing the year of publication in the *Proceedings of the London Mathematical Society* of Turing's paper from which the mathematical formula and tables on the banknote were taken. We plan events in the coming year to celebrate the arrival of these treasures at the Society.

One thread that links many areas of the Society's work is the importance of diversity and inclusion in mathematics. From grant schemes that aim to support those with caring responsibilities, to tutorial programmes for A-level students from under-represented backgrounds, to celebrations of profound contributions to mathematical knowledge from across the mathematical community, the Society is committed to ensuring that mathematics is open to everyone.

It is of course only possible in this brief introduction to highlight a small number of the Society's activities and achievements this year. A fuller description of the work of the Society in 2020–21 follows. Further information about the Society's work can be found on its website.

MISSION

The London Mathematical Society has, since 1865, been the UK learned society for the dissemination and promotion of mathematical knowledge. Our mission is to advance mathematics through our members and the broader scientific community worldwide.

The Membership

Around 3,100 mathematicians and students of mathematics are members of the Society. Our members are at the heart of the Society as it supports mathematics and the mathematical community. Volunteers' contributions are vital to the Society in defining its priorities, running its activities and achieving its objectives. The Society at present has 25 committees with more than 200 volunteer committee roles and other individual roles, as well as 32 volunteer roles representing the Society on external committees.

The Society's diverse membership includes mathematicians at a wide variety of different career stages and from around the world. In 2020–21, the Society signed two new Reciprocity Agreements: one with the Allahabad Mathematical Society and one with the Indonesian Mathematical Society. Such agreements allow full members of either Society to join the other Society at a reduced cost, provided that the members normally reside outside the country of the Society to which they pay reduced fees. Approximately 20% of the Society's members are based outside the UK and the membership is drawn from over 60 different countries.

In 2021, the Society was delighted to elect Professor Ngô Bảo Châu, (University of Chicago, USA, and Vietnam Institute for Advanced Study in Mathematics), Professor Laure Saint-Raymond, (Institut des Hautes Études Scientifiques (IHES), France), Professor Peter Sarnak, (Institute of Advanced Study, Princeton, USA) and Professor Ya-xiang Yuan, (Chinese Academy of Sciences in Beijing, China) as Honorary Members.

Communications and Engagement

This year, the Society agreed a Communications Strategy and Operational Plan and it appointed a Council member to lead on communications matters. As part of the Strategy, communications has become a standing item on the agendas of the Society's key Committees, to ensure that newsworthy

(clockwise from top left) LMS Honorary Members Ngô Bảo Châu, Laure Saint-Raymond, Ya-xiang Yuan and Peter Sarnak.

developments are picked up and shared through the most appropriate communications channels.

Communication with its members and with other audiences including the wider mathematics and STEM community, policy makers and the public as a whole is key in ensuring that the Society keeps abreast of the most interesting and exciting developments in mathematics and the mathematicians associated with this work. The Society acknowledges achievements in mathematics through prize-giving, Honorary Memberships and invitations to give lectures.

Effective communication also ensures that the Society can identify the current concerns within the community and can work to help address them. This year, the Society has made a number of public statements including on the proposed reduction in the size of the Pure Mathematics Group at the University

of Leicester and on the conviction and violation of the human rights of Russian mathematician Azat Miftakhov. As a result of the changes at the University of Leicester, the Society collaborated in the foundation of the Protect Pure Maths campaign, one of the aims of which is to protect pure mathematics departments from further significant cuts.

We are grateful for the assistance of the network of LMS Representatives across UK universities, who help us to identify issues of concern and to communicate with our members. Currently, there are 65 LMS Representatives with whom the Society communicates via monthly emails and an annual LMS Reps Day at which the Society can engage with and obtain feedback from the Reps. The 2021 LMS Reps' Day took place online. The discussions highlighted the need for the Society to support as many opportunities for networking face-to-face as possible, and to prioritise schemes that promote retention and that help early career researchers.

In addition to the LMS Representatives there is also a network of Good Practice Scheme (GPS) Representatives who provide contact points between GPS Supporter departments and the Society. The GPS is a Society initiative which encourages mathematics departments to embed equal opportunities for women within their working practices. There are currently 61 GPS Representatives at departments across the UK. The Society also engages with equality and diversity issues in mathematics more broadly and this work will continue over the coming year.

The regular mid-month LMS e-Update keeps members informed of upcoming events and grant deadlines.

In 2020–21, the Society began to publish in the LMS Newsletter a series of 'Maximising Your Membership Benefits' articles. These aim to highlight the benefits to LMS members so that they can make the most of their membership.

The LMS has three active Twitter accounts, @LondMathsoc, @womeninmaths and @DeMorganHouse. The combined number of followers for the past year has increased to over 35,700. The Society's YouTube Channel subscriptions have risen to over 9,300. The Covid-19 pandemic afforded the Society the opportunity to record lectures online through video conferencing packages and to provide a more varied content stream for the Society's YouTube Channel. Recent lectures include the Scheme 3 online lectures, 2021 Popular Lectures and the 2021 General Meeting Lecture presented by Professor Emily Riehl (Johns Hopkins University). The UK Women in Mathematics LinkedIn Group has remained constant at around 130 followers.

The Society's Newsletter continues to function as a central resource for mathematical and Society news and events. In 2020-21, the Newsletter has included mathematical feature articles on a diverse range of topics such as Pólya Urns, Penrose's Incompleteness Theorem and Floating-Point Arithmetic. A new regular feature by Nick Trefethen, 'Notes of a Numerical Analyst', was introduced. The Editor-in-Chief, Eleanor Lingham, stepped down in July 2021 and was succeeded by Alina Vdovina.

2020–21 highlights

- **Agreement of a Communications Strategy and appointment of a Council member to lead on communications matters.**
- **Launch of the Protect Pure Maths campaign**
- **Four new Honorary members elected: Professor Bảo Châu Ngô, , Professor Laure Saint-Raymond, Professor Peter Sarnak, and Professor Ya-xiang Yuan, (Chinese Academy of Sciences in Beijing, China).**
- **Two new Reciprocity Agreements signed: with the Allahabad Mathematical Society and with the Indonesian Mathematical Society.**
- **Increased engagement with the Society on social media: over 35,700 followers on Twitter and over 9,300 subscribers to the Society's Youtube channel.**
- **More recorded lectures made publicly available.**

2021–22 plans

- **The Society will continue to support members and the mathematical community during, and after, the Covid-19 pandemic.**
- **Introduction of new tiered Ordinary Membership Subscription Fees.**
- **Introduction of a new membership benefit: free online access to the journal, *Mathematika*.**

SUPPORTING MATHEMATICS RESEARCH

Objective: to advance mathematical knowledge by enabling mathematicians to undertake research and collaboration, and by supporting them in their efforts.

The Society supports mathematical research by making grants, awarding prizes, maintaining and making available the Society's Library and through its support and funding for computer science initiatives.

Grants

The Society's grants schemes (listed in Annex 5) are at the centre of the Society's work to advance mathematical knowledge. Financial support for mathematicians includes grants to:

- facilitate research conferences;
- support education and teachers' continuing professional development;
- help with caring responsibilities and career breaks; and
- develop international mentoring opportunities.

The Society's smaller-scale grants fulfil a crucial role in the UK mathematical funding landscape. The Society's grants can offer mathematicians the opportunity to organise much-needed specialist conferences, work collaboratively through short visits, and enable the development of research partnerships, all of which significantly contribute to career development and promote UK mathematical research at its roots.

Through its core research grant schemes the Society has continued to provide support to many mathematicians and their research. In 2020–21 the Society's Research Grants Committee awarded a total of £112.6k to 78 grants via its core grant schemes and supported 95% of the 82 applications received under these grant schemes. As part of the Society's response to the pandemic, the Research Grants Committee enhanced its support for those who found themselves without the time to engage in research during the Covid-19 pandemic, due to illness, caring responsibilities, increased teaching or administrative loads, or other factors, with the introduction of the Research Reboot Scheme. Two rounds of applications resulted in £13,989 being granted to support 29 researchers to reboot their research.

Meanwhile, the recordings for the online lecture series — supported by grants in 2019–20 — were received

in Autumn 2020 and published on the Society's YouTube Channel. These lectures were given by early career researchers who were part of Joint Research Groups but did not have permanent positions, and were aimed at new PhD students starting in September 2020.

Formerly known as the LMS–Durham Symposia, the first LMS–Bath Mathematical Symposium was held online in August 2020 on the subject of *Mathematics and Machine Learning*, and the symposium programme will continue until 2025. The Symposia are an established and recognised series of international research meetings, since their foundation in 1974, that provide an excellent opportunity to explore an area of research in depth, to learn of new developments, and to instigate links between different branches of research. The format is designed to allow substantial time for interaction and research. The meetings are by invitation only and will be held in August, usually lasting for two weeks, with up to 50 participants, roughly half of whom will come from the UK.

A novel element of the symposia is that they will be complemented by a summer school, to prepare young researchers such as PhD students, or a “research incubator”, where problem(s) related to the topic of the conference are studied in groups. These events can take up to an additional week. Two LMS–Bath Mathematical Symposia online Summer Schools took place in 2021. Due to the Covid-19 pandemic, the associated workshops have been postponed.

- 19–23 July 2021, LMS–INI–Bath Online Summer School on K-Theory and Representation Theory
- 26 July–6 August 2021, LMS–Bath Online Summer School on Combinatorial Algebraic Geometry

International schemes

The Society supports international mathematical activities through its partnerships with the American University in Beirut (AUB), the African Mathematical Millennium Science Initiative (AMMSI) and the International Mathematical Union (IMU). The Society is the UK's ‘adhering organisation’ to the IMU, through the International Affairs Committee and its secretariat. The

Society also offers travel grants to support attendance of UK-based mathematicians at the European Congress of Mathematics (ECM) and the International Congress of Mathematicians (ICM).

In 2020–21, the Society and the AUB ran a second round of the Atiyah UK-Lebanon Fellowships to provide support for either an established UK based mathematician to visit Lebanon for up to six months or for a mathematician from the Lebanon of any level to visit the UK to further their study or research for a period of up to 12 months. One Fellowship was awarded in 2021–22 to support visits by Maciej Dunajski (Cambridge) to the Center for Advanced Mathematical Sciences at the AUB and to Notre Dame University-Louaize. Due to the Covid-19 pandemic, the planned visits by the two previous Atiyah Fellows were postponed from 2021: a visit by Mark Wildon (RHUL) to the AUB and a visit by Ahmad Sabra of the AUB to the University of Sussex.

Through its Scheme with AMMSI, the Society normally supports postgraduate student attendance at mathematical conferences held in Africa. However, social distancing and lockdown measures across the continent due to Covid-19 resulted in fewer conferences and no applications to the scheme in 2020–21.

In 2020–21, the Society continued its administrative support for the IMU's Breakout Graduate Fellowships. Funded by the IMU through donations from prestigious mathematicians, the Fellowships offer financial support of up to US\$10,000 per year to PhD students in developing countries for part or all of their PhD. Three awards are made each year.

Four partnerships were awarded grants under the Mentoring African Research in Mathematics (MARM) programme in 2019-20, and the grant periods for these partnerships began in December 2020. MARM operates in collaboration with AMMSI, using LMS funding combined with funding from the International Mathematical Union Commission for Developing Countries (IMU CDC). Including the current partnerships, 25 awards have been made under the programme: in Cameroon, Congo, Ethiopia, Ghana, Côte d'Ivoire, Kenya, Malawi, Morocco, Nigeria, Rwanda, South Africa, Tanzania and Uganda. The programme continues to inspire a high application rate from both African institutions and potential European partners and the Society hopes that funding for the scheme will continue into the future, for the benefit of mathematics across the two continents.

Through its ECM Travel Grant schemes to support early career researchers and established researchers, the Society awarded 13 grants to support attendance by UK-based mathematicians at the 8ECM in June 2021, which was held as a hybrid event, having been postponed from 2020 due to the Covid-19 pandemic.

Prizes

The Society awarded a number of LMS Prizes this year, as well as working in partnership with the Institute of Mathematics and its Applications (IMA) to award the IMA-LMS David Crighton Medal. The Pólya Prize, the highest LMS prize given this year and which is in recognition of outstanding creativity in, imaginative exposition of, or distinguished contribution to mathematics in the UK, was awarded to Professor Ehud Hrushovski for his profound insights which transformed very abstract model-theoretic ideas into powerful methods in well-established classical areas of geometry and algebra. The Crighton Medal was awarded to Caroline Series in recognition of her fundamental and beautiful results connecting geometry and dynamical systems, and her outstanding service to the mathematical community. The Society also awarded the Hirst Prize and Lectureship to Professor Karine Chemla, in recognition of her outstanding work in the history of mathematics. This is now awarded as a joint prize with the British Society for the History of Mathematics. The Society extends warmest congratulations to all prize winners.

Library

The Society's Library is housed at University College London (UCL). The Library Committee meets annually with representatives from the Science Library at UCL to review the Society's 96 international journal exchange agreements, and to review the services offered by the UCL Library to

members of the Society. This year, the Society received a donation from AEL Davies of a copy of *Urania Propitia* and the gift of a low serial number Turing £50 bank note from the Bank of England (see Introduction). The Society also received two donations to the Hardy Collection from the late Peter Neumann: Jordan's *Traité des Substitutions* and Cayley's *Memoir on Quantics*.

The low serial number Turing £50 bank note donated by the Bank of England

Computer Science

The 2020 Computer Science Colloquium was held on 19 November 2020 with the topic Algorithms, Complexity and Logic. The event was held online, via Zoom. Speakers were Anupam Das, Nobuko Yoshida, Kitty Meeks and Igor Carboni Oliveira. The event, aimed at PhD students and post-docs, was very successful, with over 100 attendees.

The LMS/BCS–FACS (British Computer Society–Formal Aspects of Computing Science) Evening Seminar, held in collaboration with the FACS Specialist Group, would have taken place in November 2020, but was postponed to the following year owing to Covid-19. The Society also normally supports the British Colloquium for Theoretical Computer Science (BCTCS) by funding the costs of an overseas speaker. However, as the event took place online, there were no speaker costs and the grant was withdrawn.

The LMS Computer Science Committee has this year continued its work on Impact Acceleration Papers. This is an initiative coordinated jointly by the Industrial Mathematics Knowledge Transfer Network (IM-KTN) and the Society. The committee commissioned two Impact Acceleration Papers in 2019–20, with the current expectation that they will be published in late 2021–22. Impact Acceleration Papers address areas where mathematics and computing have come together to provide significant new capability that is on the cusp of mainstream industrial uptake.

The Computer Science Committee awarded five Scheme 7 grants to facilitate collaborations in research at the interface of mathematics and computer science, to a total of £4,930.

2020–21 highlights

- **£552,274 awarded in grants to support mathematics (combined total of all grant schemes)**
- **Research Reboot (Scheme 4) launched to help mathematicians revitalise their research.**
- **First LMS–INI–Bath Symposium Summer School and first LMS–Bath Symposium Summer School.**
- **Pólya Prize awarded to Professor Ehud Hrushovski.**
- **Crighton Medal awarded to Caroline Series.**
- **Hosted a Spitalfields History of Mathematics Meeting with UCL Special Collections to showcase the digitised collection of the Educational Times.**
- **Thanks to a generous donation from the Liber Foundation, the Society has been able to award four more Emmy Noether Fellowships to support mathematical researchers with caring responsibilities.**

2021–22 plans

- **Incorporate the successful online lecture series grant scheme into Scheme 3.**
- **Continue the Research Reboot grants (Scheme 4).**
- **Support UK-based mathematicians' attendance at the International Congress of Mathematicians in St Petersburg, through travel grants.**

REPRESENTING AND PROMOTING MATHEMATICS

Objective: to promote widely mathematical sciences research and its broad benefits to decision makers, policy advisers, funders and users of mathematics.

Through its external and public relations the Society aims to ensure that the centrality of mathematics to so many aspects of society is represented to Government, other national policy-makers and influential organisations and individuals in order to inform debate and improve decision-making. The Society undertakes significant collaborative work advocating for mathematics both individually and through the Council for the Mathematical Sciences (CMS).

Public affairs

The LMS Research Policy Committee has continued to seek robust evidence to inform its policy contributions. In 2020-21 the LMS 'Evidence Bank' was published on the LMS website and the Committee is currently consulting with other societies and HoDoMS regarding additional data to be included in it. The guidance document on Care for PhD Students was completed and the document will be distributed in autumn 2021. The Committee is working with the Women and Diversity in Mathematics Committee to request updated benchmarking data from HESA, which will include statistics relating to ethnicity as well as gender. Finally, the Committee continues to cultivate its relationship with Engineering and Physical Sciences Research Council (EPSRC), working closely with EPSRC representatives to keep informed of the latest developments relating to mathematics research funding and to advocate on behalf of the community.

For the eighth year the mathematical sciences, through the CMS, were represented in the prestigious STEM for Britain poster competition, which brings together young researchers across all STEM (Science, Technology, Engineering and Mathematics) disciplines and Members of Parliament. The event is normally held at the House of Commons, but this year was held very successfully online.

Within the mathematics research community the LMS President has represented the Society widely at various events, ensuring national and international recognition for the Society and for UK mathematics as a whole, and ensuring the Society's and the UK's input into international discussions. The President has

represented the Society at a CMS Board meeting, the British Mathematical Colloquium, an EPSRC meeting on strategic priorities funding and joint meetings with the Institute of Mathematics and its Applications and the Royal Statistical Society.

Council for the Mathematical Sciences

The Society is a founding member of the CMS which aims, through its member bodies, to draw together the mathematical community to speak with one voice on national issues of mutual concern. The CMS provides a forum for the consideration of matters of joint interest; it responds and makes representations to Government and others on relevant issues.

The CMS represents the mathematical sciences to government, in particular to the Department for Business, Energy and Industrial Strategy (BEIS). It meets regularly with the EPSRC and aims to have similar interaction with UK Research and Innovation (UKRI). The key focus of these meetings this year has been the additional government funding for the mathematical sciences announced in 2020, and how CMS members can help ensure its effective use. The CMS is also a member of the Parliamentary Collaboration Steering Group for STEM learned societies.

The CMS has continued to support the Royal Society Advisory Committee on Mathematics Education (ACME), currently chaired by Sir Martin Taylor FRS. The four 'contact groups', based within the Royal Society governance structure and reporting directly to ACME, continue to work well. In addition, The Mathematical Futures Programme, launched in February 2020 and overseen by ACME, continues and aims to deliver a range of outputs between Autumn 2021 and Spring 2022.

The CMS Chair, Professor Sir Ian Diamond, who was appointed as National Statistician in October 2019, continued to promote the fundamental value of the mathematical sciences to government and its funding agencies, despite significant calls on his time due to the Covid-19 pandemic. A Big Mathematics Initiative (BMI) virtual event entitled An Academy for Mathematical

Sciences was held, which brought together over 250 members of the mathematical community to discuss the role and mission of an Academy. A small working group is taking this work forward with the aim of producing a green paper by autumn 2021 for consultation and feedback.

Collaborative working

The Society works actively and collaboratively through its membership of and funding for a number of mathematics and science organisations to ensure the interests of mathematics are represented in national policy and public debates and to ensure the Society is kept informed of external policy issues. The Society is a member of the UK Parliamentary and Scientific Committee, the British Science Association, the Joint Mathematical Council, the Campaign for Science and Engineering (CaSE) and the Foundation for Science and Technology. The Society also works in association with the UK Heads of Departments of Mathematical Sciences (HoDoMS) and is a member of the Parliamentary Affairs Committee (run by the Royal Society of Biology, on behalf of other STEM learned bodies). The Society maintains representation within a number of other organisations, including the Programme and Scientific Committees of the International Centre for Mathematical Sciences (ICMS) and the Isaac Newton Institute (INI). The Society had previously worked individually with both the Athena Forum (run by the Royal Society) and the STEM Disability Advisory Committee. In July 2020, the Athena Forum agreed to merge with the STEM Disability Advisory Committee (STEMM-DAC), with the merger taking effect in January 2021.

This year the Society provided funding for the Royal Society ACME Contact Groups.

The Society and the IMA have continued their collaborations throughout the year, including a joint LMS-IMA meeting on Topological Methods in Data Science held online, hosted by ICMS, in October 2020 and the award of the LMS-IMA Crighton Medal in 2021. The award ceremonies for the 2019 Crighton Medal winner, Professor Ken Brown, and the 2020 LMS-IMA Zeeman Medal winner, Matt Parker, are currently postponed until they can be held in person.

Development Activities

In 2020–21, the Society received a number of notable donations. Dr Tony Hill has continued with his generous donation enabling the establishment of the Levelling Up pilot scheme which went live in March 2021 (further details can be found under 'Education' on page 18) and the Heilbronn Institute for Mathematical Research (HIMR) contributed £20,000 towards the Early Career Fellowships (Round 2). Five members and friends of the Society have each donated at least £1,865 through De Morgan Donation scheme: Professor M. Bridson & Dr J.L. Bridson, Dr. C. Houghton, Professor Sir J.F. Kingman FRS, Professor Dame F.C. Kirwan FRS and Dr K. Mori.

The Society is most grateful to all donors for their gifts, which help ensure that the financial foundation of the organisation is as secure as possible for future generations, as well as making sure that the importance of the mathematical sciences is understood as widely as possible in industry and beyond.

2020–21 highlights

- **Society 'Evidence Bank' published on the Society's website.**
- **Working Group to take forward the work of the Big Mathematics Initiative (BMI) established.**
- **The Society continued its support for The Royal Society Advisory Committee on Mathematics Education (ACME).**
- **Generous donations to support the Society's grant giving and education work.**

2021–22 plans

- **Include further data in the Evidence Bank following consultation with other societies and HoDoMS.**

- **Continue to gather, analyse and report on evidence with respect to UK mathematics.**
- **Continue to bring to the attention of decision-makers and policy advisers national data on mathematics and the UK mathematics landscape.**
- **Continue to represent mathematics research and education to Westminster, Whitehall and other national funding bodies and ensure that mathematics is explicitly considered during discussions regarding STEM subject areas.**
- **Work with benefactors to support the mathematical community.**

DISSEMINATING MATHEMATICS

Objective: to disseminate mathematical knowledge and make it available worldwide.

Publications

Through its publications the Society aims to disseminate high-quality mathematical research and thinking worldwide. The Society currently publishes 12 peer-reviewed journals, seven of which are in collaboration with other learned societies and institutions, as well as two book series and individual book titles.

The Society's publications serve a dual purpose, in not only disseminating mathematical research but in providing the Society with an income which it utilises entirely in furtherance of its other charitable activities. The broad and developing portfolio of high-quality journals and books serve our authors through transparent, timely and professionally managed editorial and production processes, and serve our readers by providing content of wide interest and high quality. The Society seeks to maintain sustainable and ethical pricing for its publications, including the offer of free online access to LMS members and institutions in developing countries.

This year has seen significant work to secure renewed contracts for the publication of some of the Society's key journals.

In October 2020, the LMS signed new contracts with the Russian Academy of Sciences and Institute of Physics Publishing for the continued publication of the translated Russian journals *Sbornik: Mathematics*, *Izvestiya: Mathematics* and *Russian Mathematical Surveys* until the end of 2025.

A Memorandum of Understanding was signed with Wiley in December 2020 for the continued publication of the *Bulletin*, *Journal*, *Proceedings*, *Transactions*, the *Journal of Topology* and *Mathematika* for the period 2022–26. This followed a tendering process during which the Society invited bids from academic publishers and carefully reviewed its publishing requirements and ambitions. The terms of Wiley's winning bid reflect major changes to publishing. From 2022 the journals

will become electronic only. In addition, the move towards more content being published Open Access, which produces lower income per article, and greater access to free content will reduce the Society's income from its publications in the future. The Society has taken steps to respond to these changes (see 'Managing the Society Effectively' below).

A Letter of Intent from Cambridge University Press for the continued publication of *Compositio Mathematica* during 2022–26 was received and countersigned by the LMS in May 2021.

More broadly, other developments included:

- The publication in January 2021 of the first issue of the *Proceedings* edited by its new Editorial Board, containing articles accepted after its re-launch in March 2020 as the flagship journal of the Society.
- The appointment of a new, separate Editorial Board from March 2021 for the *Transactions*, the Society's fully Open Access journal. The journal's scope has been expanded to welcome papers of more specialised nature as well as those of general interest.
- Ongoing publication of Open Access survey articles in the *Bulletin*, using a legacy provided by Frank Gerrish to support publication charges where institutional funds are not available to the authors.
- Work by the Society aimed at ensuring that there are compliant options available to authors whose funders have mandated that they publish with immediate Open Access.

The Society continues to develop strategies, identify risks and opportunities and to engage with wider developments that may affect its publishing programme.

Society Lectures and Meetings

Meetings

Society Meetings enable both members of the mathematical community and the wider public to meet, hear about and discuss current mathematical thinking and developments. In 2020–21, for the first time all Society Meetings were held online, with support from the host

institutions and the ICMS. Meetings during 2020–21 were the Joint IMA/LMS Meeting, the Black Heroes of Mathematics Conference (in conjunction with the IMA and the BSHM), the LMS Spitalfields History of Mathematics Meeting, the LMS Mary Cartwright Lecture, the LMS Midlands Regional Meeting (University of Lincoln), the Society General Meeting and Society Meetings as part of the Joint Mathematics Meeting 2021, the British Mathematical Colloquium/British Applied Mathematics Colloquium 2021 and the 8th European Congress of Mathematics.

Lockdown restrictions continued into 2021 and as mentioned above all meetings were moved online. Several meetings postponed from 2020 were able to take place making full use of the new online functionality which had been developed over the previous year. The Society Meeting at the British Mathematical Colloquium (BMC)/British Applied Mathematics Colloquium was hosted by ICMS on behalf of the University of Glasgow and the Mary Cartwright Lecture was able to go ahead in May 2021. In June 2021, both the Society General Meeting and Lecture and the Graduate Student Meeting took place online, hosted by the Society. Professor Emily Riehl (Johns Hopkins) presented the lecture at the General Meeting to over 80 members and guests, and Professor Markus Land (Copenhagen) gave the Graduate Student Meeting lecture to around 40 members and guests.

Lecture series

The Society's funding for visiting international lecturers helps enable UK-based mathematicians to engage in

2022 Invited Lecturers Gitta Kutyniok (left) and Olga Kharlampovich

dialogue with current mathematical thinking from across the world. However, travel restrictions introduced during the Covid-19 pandemic meant that neither the Invited Lectures Series nor the postponed Hardy Lecture Tour could take place in person. Instead, there are plans in 2022 for a Hardy Lecture Tour by Peter Sarnak (IAS, Princeton) and an Aitken Lecture Tour by Lisa Orloff-Clark (Victoria University of Wellington). There will also be two Invited Lecture Series as follows:

- Gitta Kutyniok (Munich) will visit Cambridge to give the LMS invited Lectures on *Mathematics of Deep Learning*.
- Olga Kharlampovich (CUNY Graduate Center and Hunter College) will visit Newcastle to give the LMS invited Lectures on *Equations in Groups and Complexity*.

2020–21 highlights

- **Memorandum of Understanding signed with Wiley for the continued publication of Society's core journals.**
- **New contracts signed with the Russian Academy of Sciences and Institute of Physics Publishing for the continued publication of the translated Russian journals.**
- **Inaugural Black Heroes of Mathematics conference, in conjunction with the IMA and BSHM.**
- **Online Society Meeting at the British Mathematical Colloquium (BMC)/British Applied Mathematics Colloquium.**
- **Mary Cartwright Lecture able to go ahead online.**

2021–22 plans

- **Continue to develop strategies and targets for publishing high-quality mathematical research taking into account the evolving scholarly publishing landscape.**

- **Continue to improve processes, workflows and communication to authors.**
- **Adopt a new page layout for the Society journals and *Mathematika*.**
- **Maintain a competitive position within mathematics publishing and uphold the LMS reputation for publishing high-quality research and exposition.**
- **Supporting and helping to organise the conference on the Unity of Mathematics in honour of Sir Michael Atiyah at the Isaac Newton Institute in Cambridge in September 2021.**
- **Host a joint Society meeting with the IMA to celebrate the centenary of Emmy Noether's paper on Conservation Laws.**
- **Host a Society Meeting to celebrate the work and legacy of Alan Turing.**
- **Host the Hardy Lecture Tour by Peter Sarnak (IAS, Princeton) and the Aitken Lecture Tour by Lisa Orloff-Clark (Victoria University of Wellington).**
- **Host two LMS Invited Lecture Series: Gitta Kutyniok (Munich) on *Mathematics of Deep Learning* and Olga Kharlampovich (CUNY Graduate Center and Hunter College) on *Equations in Groups and Complexity*.**

SUSTAINING THE MATHEMATICAL COMMUNITY

Objective: to promote equality of opportunity and a culture of fairness across all career stages, ensuring the long-term sustainability of the mathematical research community.

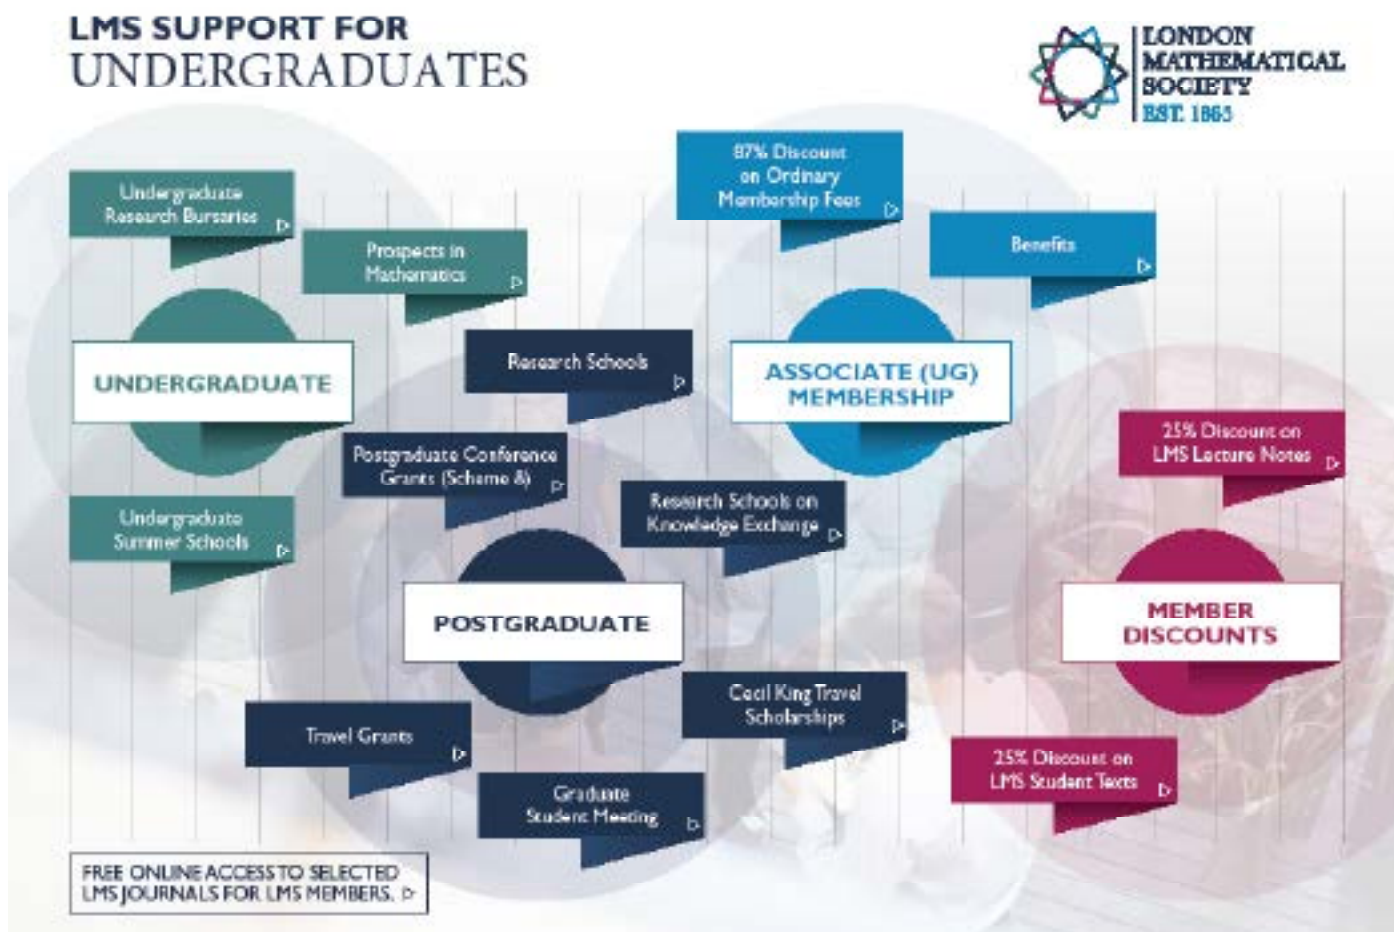

Ensuring that as much mathematical talent as possible is discovered and developed regardless of background is critical both in the interests of fairness and in the interests of academia, industry and society as a whole. This objective guides the Society's work in this area, particularly with respect to the transitions between the early career stages (undergraduate to postgraduate and postgraduate to postdoctoral) and with respect to women in mathematics and diversity more broadly.

The Society has recognised increasing concern among the mathematical community regarding career progression, particularly for Early Career Researchers at a time when some universities face

an uncertain financial future in light of the Covid-19 pandemic. To address this immediate concern, the Society redistributed funding from undersubscribed grant schemes to enhance the funding of its Early Career Fellowships.

Early career progression

The Society operates a number of schemes which provide support for the early career progress of mathematicians at undergraduate, postgraduate and postdoctoral level as well as for women in mathematics. A brief summary of the key Society schemes is given below, with further details contained in Annex 5.

For undergraduates, there are Undergraduate Research Bursaries (now in their eighth year) and Undergraduate Summer Schools.

With support from HIMR, the Society awarded over £48k in total funding to support 54 Undergraduate Research Bursaries from 83 applications in 2020–21.

The 2020 Summer School, due to be held at the University of Swansea in July 2020, was postponed due to the Covid-19 pandemic and ran in July 2021 instead. The Summer School was held as an online event with 121 students attending lectures with Q&A sessions over two weeks.

For final year undergraduates and masters' students considering a PhD in mathematics, the Society supports the Prospects in Mathematics Meeting which in 2020 was hosted online by Bath University and was attended by 200 students.

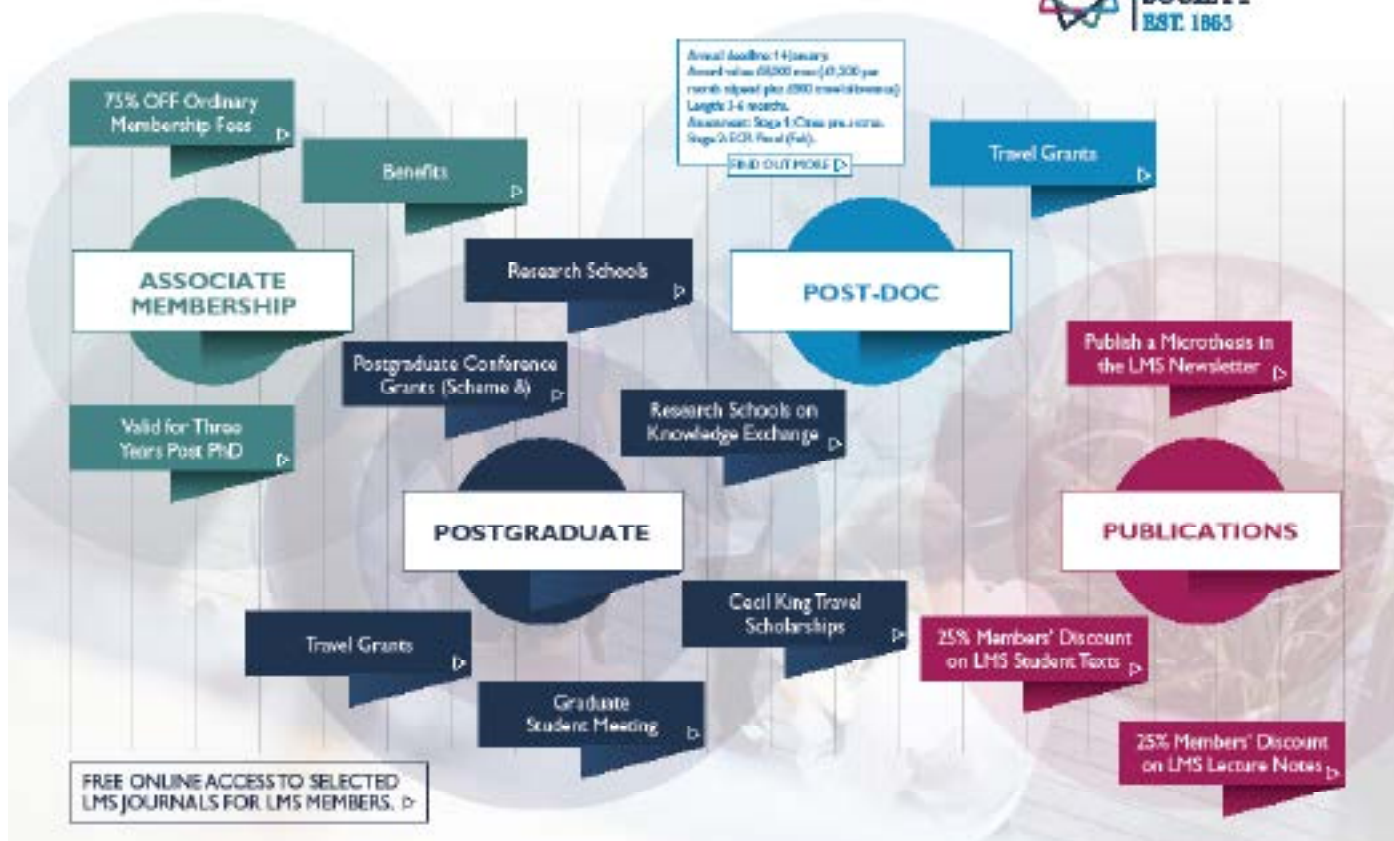

For postgraduates, there are LMS Research Schools, Cecil King Travel Scholarships to fund study or research abroad and Postgraduate Conference Grants. In 2020–21:

- Two LMS Research Schools were due to take place in Leeds (*Higher Algebra, Categorification and Quantum Theory*) and

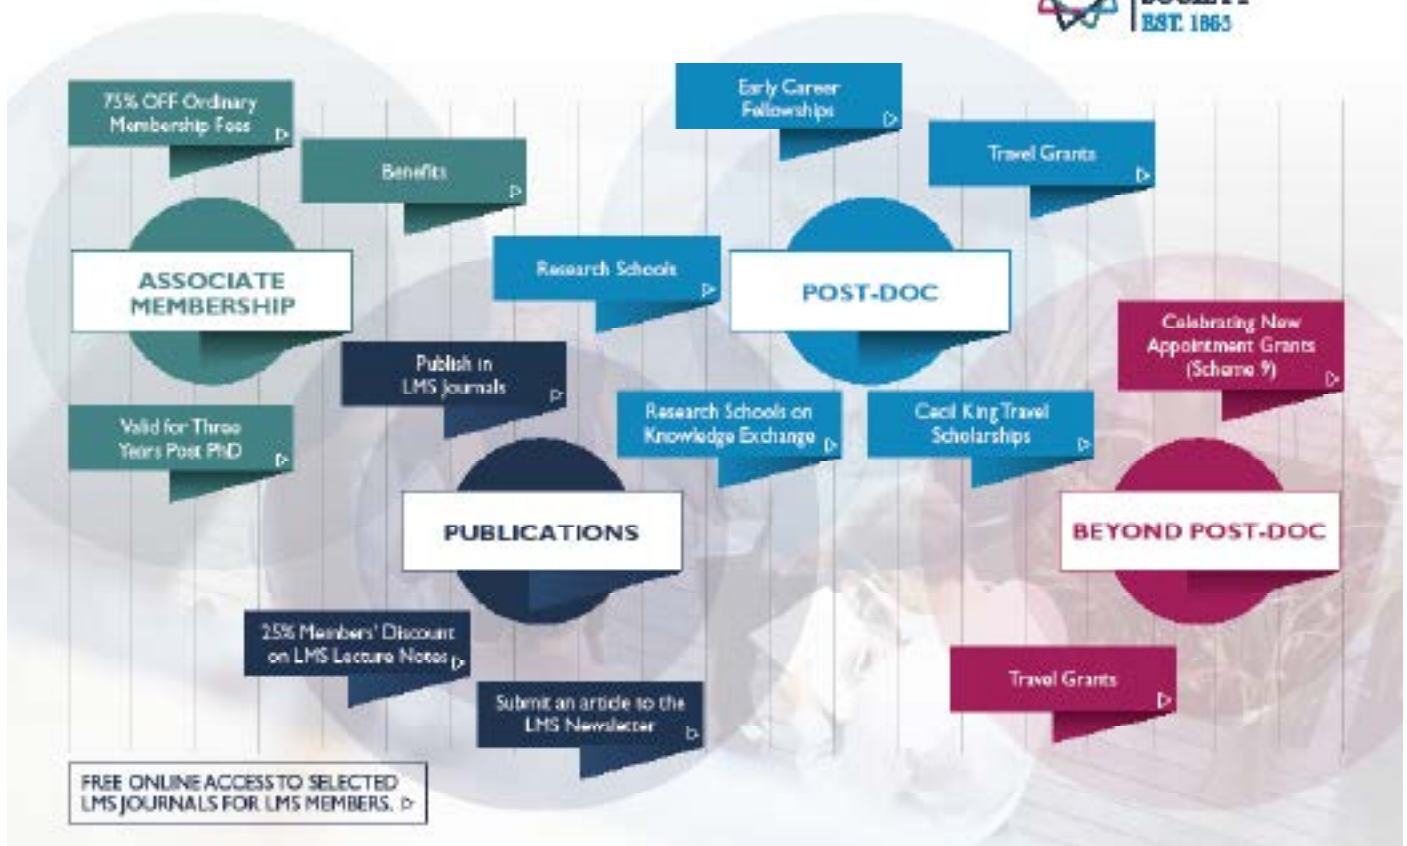

Nottingham (*Adaptive Methods & mOdel Reduction*) and one LMS Research School in Knowledge Exchange was due to take place in Lancaster (*Rigidity, Flexibility and Applications*). Together with the Research Schools that were postponed from 2020 (*Graph Packing* organised by LSE, *Methods of Random Matrix Theory and its Applications* organised by Reading and *Point Configurations: Deformations and Rigidity* organised by UCL), all Research Schools have been postponed until 2022.

- Cecil King Travel Scholarships were awarded to Ilia Gaiur (Birmingham) and Anastasia Ignatieva (Warwick).
- The Society awarded £4,350 to support 2 postgraduate conferences.
- Two online Graduate Student Meetings were held:
 - * Theo Mary (Sorbonne) gave a talk at the November meeting on *Mixed Precision Arithmetic: Hardware, Algorithms, and Analysis*.
 - * Markus Land (Copenhagen) gave a talk at the June meeting on *Infinity-categories in Algebra and Topology*.
 - * Over 80 students attended both events and 29 students gave talks about their research to their peers.

LMS SUPPORT FOR POSTGRADUATES

LMS SUPPORT FOR POST-DOCS

LMS Early Career Fellowships

In 2020–21, there was one application round which attracted 31 applications and resulted in 15 awards. Some awards were partially supported by HIMR.

Women in Mathematics

The Society continues to seek to improve the proportion of women in mathematics, including through activities led by its Committee for Women and Diversity in Mathematics. For example, the Society has championed the embedding of equal opportunities and broader issues around diversity within the working practices of UK university mathematics departments. The Committee continues to have representatives from all five constituent mathematical bodies of the CMS as well as from the Standing Committee of European Women in Mathematics, ensuring it speaks for the entire UK mathematical community. The Chair of the Committee for Women and Diversity in Mathematics represents the Society on the Athena Forum. As a result of amendments to the Society's By-Laws in July, the new Council role of Member-at-Large (Women and Diversity) was created. From the annual elections to Council in autumn 2021 onwards, the holder of this role will also Chair the Committee for Women and Diversity in Mathematics.

The Society operates the LMS Good Practice Scheme, which aims to help mathematics departments to take practical actions to improve the participation of women and to share examples of good practice with other departments. The Scheme offers support in applying for an Athena SWAN award for those departments seeking recognition for their work in this area. The Society continues to run Good Practice Scheme workshops that aim to cover a wide variety of Good Practice issues. In June 2021 the Society held an online workshop focusing on academic progression in these challenging times.

During 2020–21 the Society:

- Supported a Diversity in Mathematics Day at University College London, which looked at Fairness and Diversity in Statistical Sciences.
- Continued its support for the LGBT+STEMinar, which in 2020–21 was held at the University of Oxford.
- Received a further generous donation from the Liber Stiftung (Liber Foundation) to fund several Emmy Noether Fellowships with a value between £2,000 and £10,000, up to a total of £25,000. Four Fellowships were again awarded in 2021. The recipients this year were Dr Mirela Domijan (University of Liverpool), Dr Sinead Lyle (UEA),

Dr Constanze Roitzheim (University of Kent) and Dr Jennifer Tweedy (working at the University of Bath).

- Supported several successful online events during the year, including Women in Mathematics Days at the University of Leeds, the University of Plymouth and an event at the University of Strathclyde, which was postponed

from 2020 due to the pandemic. One Girls in Maths event was held over from 2020 with over 400 participants taking part in the event at Queens University Belfast.

- Ran the first ever online Mary Cartwright Lecture, presented by Professor Claudia de Rahm looking at *Analyticity in the Sky with (causal) Diamonds*.

2020–21 highlights

- **Continued investment of additional funding in two of the Society's grant schemes aimed at early career researchers in response to the disproportionate impact of the pandemic on this career stage.**
- **Further support for mathematical researchers with caring responsibilities through Emmy Noether Fellowships made possible by another generous donation from the Lieber Foundation.**
- **Good Practice Scheme Workshop held, focusing on career progression in the current challenging times.**
- **First online Mary Cartwright Lecture given.**
- **Modification of the Society's By-Laws to create the 'Member-at-Large (Women and Diversity)' role on the Society's Council.**
- **First online Undergraduate Summer School took place, hosted by Swansea, and attended by over 120 students.**
- **First online Prospects in Mathematics Meeting held, hosted by Bath, and attended by 200 students.**
- **Talks by 29 Graduate Students given at the LMS Graduate Student Meetings.**

2021–22 plans

- **Run at least seven Research Schools, including the first LMS Research School on Knowledge Exchange.**
- **Develop events and a careers webpage to support Early Career Researchers' Continuing Professional Development.**
- **Hold the second Black Heroes of Mathematics conference, in conjunction with the IMA and BSHM.**

ENGAGING WITH EDUCATION AND THE PUBLIC

Objective: to support mathematical education in schools, colleges and universities, and to encourage the public and young people to appreciate and engage with mathematics.

The Society wants the wider public and young people in particular to engage with and appreciate mathematics and recognise its contributions to society. It operates a number of initiatives which aim to achieve this.

Education

The Education Committee works on a number of different activities and schemes, including grants for education, public lectures and responses to consultations.

Over the past year the Society has been working on the pilot of the Levelling Up: Maths Scheme, made possible by a generous donation from Dr Tony Hill. The scheme seeks to widen participation of students from under-represented backgrounds in mathematics. The LMS has worked initially with Durham University and the University of Leicester to develop and launch online tutorials to help increase aspirations and improve grades, with the goal of enabling more students from under-represented groups to study for a STEM degree. The first cohort of students began tutorials in March 2021 with a total of 55 students participating in a programme of online tutorials delivered by undergraduate maths students. The pilot scheme has been widely well received and the ambition is to expand the scheme to involve more university partners in future.

This year the Society's Mathematics Teacher Continuing Professional Development (CPD) grants scheme made 14 awards, totalling £7,575, supporting the professional development of mathematics teachers and the improvement of mathematics teaching. The CPD scheme now includes grants for Teaching and Learning in HE, which offer partial funding for one-day workshops disseminating good practice in teaching mathematics. In addition, 24 awards, totalling £12,766, were made under the Small Grants for Education scheme, in support of events or activities that stimulate interest and enable involvement in mathematics from primary school to undergraduate level and beyond.

The Committee continues to work closely with other groups and societies in the area of mathematics education, including the Advisory Committee on Mathematics Education (ACME), the Joint Mathematical Council of the UK (JMC), Heads of Departments of Mathematical Sciences (HoDoMS) and the Higher Education Academy (HEA).

The Education Committee continues to run the Holgate Session Leader Scheme. The Scheme provides session leaders who give talks or run workshops on a mathematical subject to groups of students or teachers. The sessions are specifically mathematical in content and are intended to enrich and enhance mathematical education, looking both within and beyond the curriculum.

The Education sub-Committee, 'Teaching Mathematics as a Career' (TeMaC), continues to work towards formulating and implementing the Society's response to the national shortage of suitably qualified mathematics teachers in the UK. A code of practice for UK mathematics departments relating to promoting maths teaching was created this year and will be distributed in autumn 2021. In addition to signing up to the code of practice, mathematics departments will provide the name of a person who will act as a point of contact in their university for the TeMaC scheme. The sub-committee plans to hold its first event, which will include TeMaC contacts and other interested parties, in February 2022.

The Education Committee held the first Mathematics Communication Workshops in April and May 2021. The aim of these was to address the paucity of communications training specifically for mathematicians, and allow the LMS to take the lead in increasing the quantity and quality of mathematics communication and outreach in the UK. Two workshops, run by Ben Stokes and Katie Steckles, were held, at a beginners' and an advanced level; both received much positive feedback.

Popularisation

The Society was delighted to be able to hold once again both the Popular Lectures and the Joint LMS/Gresham College Lecture after these events were postponed in 2020 due to the pandemic. Around 100 participants attended the first ever online Popular Lectures, which were presented by Aoife Hunt (Movement Strategies) and James Maynard (University of Oxford). A third Popular Lecture was held at Maths Week Scotland, hosted by Glasgow University; the speaker was Diana Davis (Phillips Exeter Academy, USA). The Joint LMS/Gresham College Lecture was presented by Professor Julia Gog.

2020–21 highlights

- **Levelling Up online tutorials for A-level maths students commenced.**
- **14 awards totalling over £7,000 made from the Society's Mathematics Teacher CPD grants scheme.**
- **24 awards totalling over £12,000 made from the Society's Small Grants for Education scheme.**
- **Teaching Maths as a Career (TeMaC) code of practice produced.**
- **First Mathematics Communication Workshops held.**
- **First online Popular Lectures.**

2021–22 plans

- **Expand the Levelling Up Scheme to involve more university partners.**
- **Issue further LMS policy position statements to support mathematics Higher Education and education in schools.**
- **Distribute the TeMaC code of practice and continue the work of the TeMaC sub-committee to develop a community of practitioners and hold a launch event in February 2022.**

MANAGING THE SOCIETY EFFECTIVELY

Objective: to manage the Society's affairs and resources effectively and efficiently, operating where appropriate to make a not-for-profit financial return on activities, and to seek a variety of funding sources to support the Society's work.

The Society aims to ensure that its resources are put to best possible use in achieving its mission and objectives. In all its operations it aims to ensure the longevity of the Society and plan for future circumstances, while also meeting the current needs of mathematics and its community.

In doing so the Society ensures it follows best governance practices by operating in accordance with its Charter, Statutes and By-Laws and by referring to guidance from the Charity Commission and, where appropriate, professional advisors (Annex 1).

The Society is governed by a Council of Member Trustees, elected by the membership from the mathematical community (Annex 1). Day-to-day operations are undertaken by a full-time equivalent (FTE) staff of 14 at the time of writing (Annex 4). Council has chosen to delegate decision making on a number of matters to 18 standing committees and has also set up a number of temporary ad-hoc committees to deal with specific items of business (Annex 2). Council also maintains and reviews annually a Risk Register with respect to all activities undertaken by the Society.

The Society runs its financial operations in accordance with best accounting practices and ensures that all its plans and activities are underpinned by a sound financial structure. The Society's financial and governance affairs are externally audited on an annual basis.

The Society continues to update its Data Protection Policy, Privacy Notice and Procedures as new legislation is released. When the UK left the European Union, the Society faced some new obligations in relation to the data of EU citizens that it holds and processes. The Society is very grateful to the European Mathematical Society (EMS), which has agreed to act as the Society's EU GDPR Representative, to help the Society comply with these new obligations.

More detailed information on how the Society operates is available in the sub-sections that follow:

- Governance and Public Benefit
- Financial Review
- De Morgan House
- Statement of Trustees' Responsibilities

Governance and the Public Benefit

Governance

The Society's governing body is its Council, members of which are also the Trustees of the charity. The Council consists of 20 members of the Society of whom 8 are Officers (including the President) and 12 are Members-at-Large, including one 'Member-at-Large (Librarian)'.

The Officers of the Society, together with the Executive Secretary, comprise the Finance and General Purposes Committee (F&GPC), which is responsible for providing advice to Council on a number of ad-hoc matters, implementing Council's decisions and ongoing financial management.

All candidates for election to Council are provided with information on the roles and responsibilities of Trustees. Those elected attend an induction normally in advance of their first Council meeting, which includes information on the work of Council, its strategies and plans, the operation of the financial systems, the administration of the Society and the responsibilities of a Trustee. All Council members are required to return a Declaration of Interests, a Declaration as a Fit and Proper Person, and to sign up to the Society's Anti-Bribery policy; these declarations must be renewed by all Trustees on an annual basis. Staff in management positions also sign an annual Declaration of Interests.

Council met five times in 2020-21: in October and November 2020 and in January, April and July 2021. The Finance & General Purposes Committee met four times: in September 2020 and in January, March and June 2021. The Society holds an Annual General Meeting and a mid-year General Meeting each year. In 2020-21 these were held in November 2020 and July 2021, respectively.

Following a review of the Society's Royal Charter, Statutes and By-Laws – known collectively as the Standing Orders – and a vote by members in favour of amending them, a formal submission to change the documents was made to the Privy Council in February 2020. As a result of the pandemic, however, the changes to the Standing Orders were only approved in December 2020. These amendments to the Standing Orders have now been implemented.

Following a recommendation by Council, at the General Meeting held in July 2021 members approved amendments to the Society's By-Laws to create the Council role of Member-at-Large (Women and Diversity). This role will be contested as part of the annual elections to Council in autumn 2021.

Council has established several standing committees which advise Council and to which it has delegated some

decision making. A list of all committees and committee membership is given in Annex 2.

As Trustees, Council members receive reimbursement only for expenses actually incurred in attending meetings or representing the Society. However, if a Trustee carries out work for the Society over and above normal Trustee's duties, the Society may pay an honorarium for that service if there is a written agreement produced in advance between the Society and the Trustee outlining the work to be undertaken and stating the exact or maximum amount.

The Society depends heavily on the unpaid voluntary work of many of its members and others across the mathematical community. This includes those who referee papers submitted to the Society's publications, those who edit those publications or serve on the Society's Editorial Advisory Boards, those who serve on the Society's committees and those who represent the Society on other bodies, together with the members of the Council themselves, many of whom take on significant responsibilities for the Society. The Society appoints representatives on external bodies and committees; these are listed in Annex 3.

Public benefit

In shaping objectives for the year and planning activities, Council has considered the Charity Commission's guidelines on Public Benefit, including the guidance, 'Public benefit: running a charity' (PB2).

Council holds that the development and extension of mathematical knowledge, expanding humanity's ability to determine and affect the natural, artificial and social worlds, leads overwhelmingly to public benefit, providing for improved health and wealth for nations and individuals and providing tools to understand and sustain the world in which we live. The Society's activities directly correlate with its mission and its objectives, and are focused on: supporting mathematicians in their endeavours through grants for research collaboration; sharing of knowledge through conferences and publications; improving the quality of mathematics education for people of all ages; promoting mathematics and its impact on everyday life to the general public; and encouraging policies that will benefit mathematics.

Members of the general public are able to participate without charge in all Society activities of a suitable level. Charges for events aimed at professional mathematicians, whether or not members of the Society, are kept low, a policy that is maintained when deciding on criteria for grant awards. Publications are sold at prices that keep them competitive in the academic publishing world.

Financial Review

In the period 2020–21 income (excluding gains on investment assets) exceeded expenditure by £785k, against an expected budget forecast of £83k deficit. This was mainly due to underspend in Society’s activities against budget due to the Covid-19 pandemic and the associated government restrictions, some of the Society’s activities (grants and events) have had to stop for the time being. Fewer activities have meant less expenditure for the Society, but the Society deeply regrets that this is because it has provided less support to the mathematics community than it had planned.

Despite the surplus, the pandemic has undoubtedly had an impact on the Society’s income as well, with the conference business in De Morgan House coming to a halt.

The gain on Investments was £1.42m.

During the year, the value of the Society’s assets rose from £17.4m to £19.6m.

The Society has carefully monitored the performance of its investments in what has been a turbulent time for financial markets and is hopeful that its investment strategy, and its long-term investment horizon, will together mitigate the worst effects of the pandemic on the Society’s income. The Society also continues to work on developing new sources of funding.

In spite of the considerable uncertainty over the future of academic publishing, publications income has remained in a steady state. As noted earlier in this report, the Society is set to lose a significant part of its income from its publications activities soon. Although Council is actively exploring other sources of income, it is clear that these cannot generate the necessary replacement income in the short-to-medium term. During the first half of 2021, two dedicated Council

discussions were therefore held to decide how the Society should respond to the income reduction it faces. Council reviewed all the Society’s activities in order to identify savings and decided on reductions in its budget for the 2021–22 financial year accordingly.

The Society remains in a strong position financially and has significant reserves readily available to fund future activities. Given the continuing volatility in the economic climate the Society will keep under review where resources might best be used to further the Society’s aims.

The sources of income (see Figure 1) were:

- Publications: 65.8%
- Investments: 16.0%
- Conference facilities and rentals: 3.8%
- Members’ subscriptions: 4.6%
- Grants and Contracts: 4.2%
- Advertisements in LMS Newsletter: 0.2%
- Donations: 4.6%
- Other: 0.8%

Figure 2 (on page 24) shows expenditure (including governance and support costs) broken down by objective. These were:

- Advancing mathematics (e.g. membership, links with the mathematics community, library, prizes): 14.6%
- Enabling mathematics (e.g. grants, and training courses): 28.8%
- Disseminating mathematics (e.g. publishing, meetings and lectures): 29.9%
- Promoting mathematics (e.g. decision/policy makers, education, public, media): 15.0%
- Other (e.g. conference facilities costs, managing residential properties, investment management fees): 11.7%

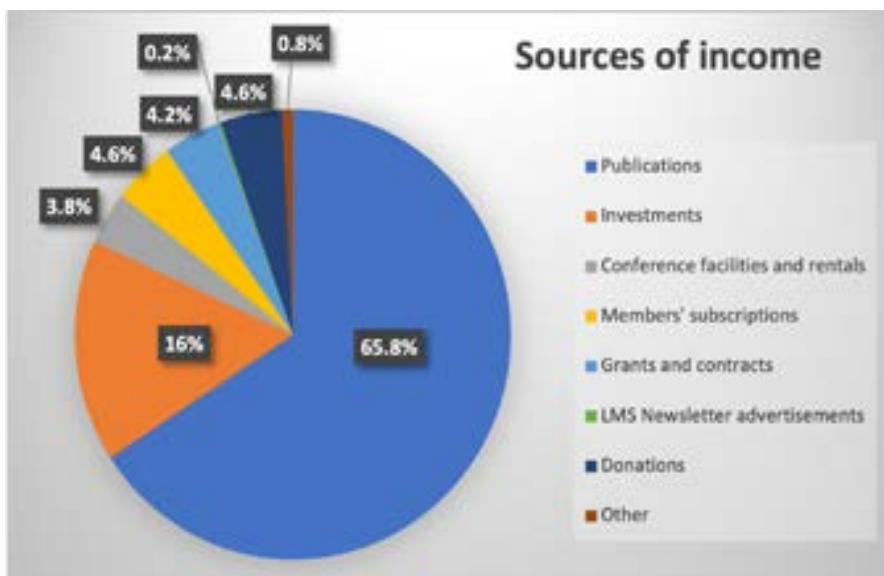

Figure 1: sources of income 2020/21

Budgets are set by Council on the recommendation of F&GPC, based on bids from budget holders, in line with the strategic objectives of the Society. Expenditure is monitored quarterly by F&GPC, which is responsible for recommending any variation in the budgets set by Council.

The full audited accounts of the Society, including the accounting policies, are annexed to this report.

Risk management

Council and F&GPC annually review the Society’s Risk Register with the

aim of ensuring that it identifies and quantifies potential risks to the Society and its plans and objectives, and that it lays out systems and strategies for mitigating those risks. Risks are addressed under the following headings: Governance and Management, Law and Regulation, Reputation, External and Environment, Financial, and Operational. In certain cases Council has established Designated Funds to set against potential risks (see Reserves below); the risks or commitments that are covered by each fund are reviewed and revised annually.

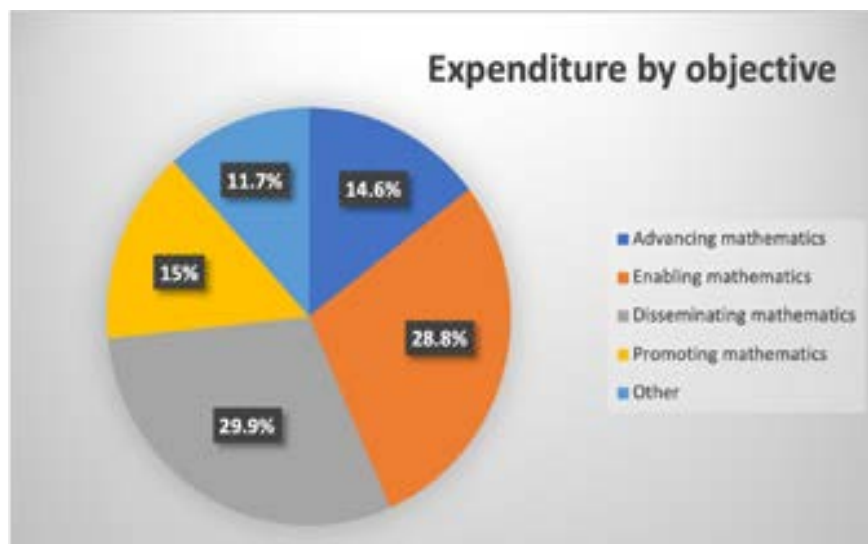

Figure 2: expenditure in 2020/21 broken down by objective

The Covid-19 pandemic has had an impact on many areas of the Society's activities and has increased the probability of a number of existing risks in the Risk Register materialising. Indeed, some of these risks (for example, the loss of access to De Morgan House) have materialised, although it is anticipated that this is temporary. The impact of the virus has been reflected in changed risk ratings and commentaries against relevant risks. All Covid-19 adjustments to the Risk Register have been tagged so that these changes (i) are easier to see at a glance, and (ii) can be targeted for review — and removal — as and when the Covid-19 pandemic recedes and the related restrictions are eased.

The Risk Register includes the potential threat to Publications income, which as noted earlier will have a significant adverse effect on the income which the Society derives from its learned journals. As noted elsewhere in this report, as part of its response to this risk, the Society initiated a formal tendering process for partnering to publish the *Bulletin*, *Journal*, *Proceedings*, *Transactions*, the *Journal of Topology* and *Mathematika* from January 2022. Key terms have been agreed with partners for the extension of publishing arrangements beyond 2021, with detailed agreements expected to be signed in the autumn of 2021. As also noted elsewhere in this report, the Society has taken steps to manage the impact of such changes to its finances.

Reserves

Council reviews its policy on reserves on an annual basis. The unrestricted reserves comprise a General Fund and other Designated Funds. In addition there are several Restricted Funds. Council has several specific Designated Funds to meet the potential costs of activities, to set against risks relating to the building and to publishing (see above) and to meet grant awards made for projects or activities which span a number of years — these are given at Annex 6. The Society has

a broad-ranging programme of activities in support of its strategic objectives as described in this report. While some activities are supported from Restricted Funds, all need continuity of funding. Due to the scale and future risks to academic publishing (a key part of the Society's income), Council continues to operate from the basis that it is prudent to hold a General Fund from which income can be drawn to maintain and extend its charitable activities. The General Fund acts both to provide income for activities not funded from Designated or Restricted Funds, and also as a 'free reserve', providing adequate working capital for the Society to operate effectively and efficiently, and for the pursuit of the Society's objectives as Council may from time to time determine.

The Society holds several Restricted Funds, as described in the audited accounts. These originate from various donations and bequests and are invested and accounted for on an aggregated 'total return' basis.

Grant Awards and Commitments

Where the Society has contractual or constructive obligations to make grant payments these amounts are accrued in the accounts in accordance with the requirements of the Statement of Recommended Practice (SORP). Resources expended on grants shown in the Statement of Financial Activities (SoFA), therefore, recognise (within the year the grant is awarded) both liabilities and provisions for grant commitments. Normally grant commitments will be claimed by the end of the financial year, although the claim period may be extended by a further year where the start or end date of the grant so requires.

The Society also awards some grants with conditions for payment (such as delivery of a specific level of service or other specific output). Such commitments are reserved in the Designated Funds, and the grants are only recognised in the SoFA when the recipient of the grant has provided evidence of the specific service or output.

Investments

The Society decided to invest up to 30% of its relevant assets in residential property, as valued at the time of purchase, with the remainder given over to the Society's investment managers. Investment in such residential property would be directly managed by the Society rather than the investment managers. The percentage calculation excludes the value of De Morgan House, though this could be reviewed at any point. Also excluded are any investments made by the investment managers in the property area of asset classes.

Quoted investments

The current quoted investment strategy for the portfolio, which is managed by investment managers Schroders (Cazenove), has been modelled to achieve RPI + 4% per annum nominal return over five years (a 4% return in real terms after allowing for average service sector wage inflation). Due to the change in the investment climate Council agreed to accept a lower than 4% return in order to reduce risks. Close attention is paid to our investment policy and to the performance of Schroders, with whom we have regular meetings.

The drawdown each year, as agreed by Council, follows the 'Yale model' and consists of 50% of the previous year's drawdown together with 3.5% of 50% of the current value of the portfolio.

Thus the drawdown is determined by a formula and so may be less or greater than the dividends and interest received: it is shown in the SoFA as Investment Income. The growth in the value of the Society's investments (capital plus income) is the sum of this drawdown and the figure shown in the SoFA for Gains on investment assets. The scale of the Society's activities is designed to match this level of return through the annual budgeting process.

The majority of the Society's reserves – both Restricted and Unrestricted – are invested and managed by the Society's investment managers, Schroders (Cazenove). It is Society policy to review on a regular basis the performance of those professional bodies it employs. Accordingly, Council has an Investment Sub-Committee, which includes up to six external financial experts, to provide professional advice on the Society's investments and on Schroders' performance. Council has confirmed an investment mandate with discretionary powers with

Schroders, based on a 'total return' basis, designed to maximise investment income while maintaining the real value of the investments.

The investment managers have discretion in both the mix and selection of investments in order to meet the growth targets for the portfolio, without exposing to undue risk the Society's reserves, on which its future capacity to maintain its activities depends. The primary long-term target is that the Society's portfolio produces a total return of inflation (RPI) plus 4% pa. The portfolio has exposure to a range of equity, cash, fixed-interest investments and alternative asset classes in both UK and overseas markets, accessed via a single investment in the Schroder Charity Multi-Asset Fund. A summary of the main categories of investments and the geographical split is provided in the notes to the financial statements in accordance with the Charities' SORP. The Schroder Charity Multi-Asset Fund is a common investment fund designed for charities seeking to maintain the real value of their capital over the medium to long term whilst generating a sustainable and reliable distribution level (from income and capital). The portfolio which aims to deliver returns similar to equity markets but with a lower level of volatility, is well diversified across asset classes. This approach is considered by the trustees to give optimum total return without exposing the Society's investments to undue risk; it is consistent with the principles set out in the Charity Commission guidelines Inconforms with the Trustee Act 2000.

Residential property investments

As a safeguard against fluctuating performance of the stock exchange, the Society expanded its investments portfolio to include residential property and now owns seven long lease residential properties (four in Central London and three in the Birmingham area), all of which are rented out. The rental derived is shown on the SOFA under 'Investment Income'. The growth in the value of the Society's residential property investment will be shown in the SOFA as Gains on investment assets. The primary long-term target of the Society's residential property is to produce a yield of 4% pa and to increase in capital value by at least the rate of inflation.

De Morgan House

Staff management

The Society currently employs a team of full and part time staff. These staff are predominantly based in normal circumstances within De Morgan House. As a result of the Covid-19 pandemic, staff largely worked from home from March 2020 until July 2021. Since July 2021, the lifting of government restrictions has allowed a return to more in-person working at De Morgan House. At the time of writing, staff were working three days a week at De Morgan House and two days a week from home. A list of staff in post during the period is at Annex 4.

The Executive Secretary is responsible for staff-related issues with strategic overview provided by the Society's Personnel Committee.

The remuneration of all staff within the Society is considered in detail by Personnel Committee and set against the salary scales of the University of London. Any recommendations from the Personnel Committee regarding remuneration are then formally approved by the Trustees (the governing Council). The pay ranges for key management personnel (Senior Management Team) are determined and set by Trustees following analysis of roles and performance by the Personnel Committee. The Personnel Committee will also, as appropriate, compare the Society's pay ranges with those of similar roles in other similar organisations.

De Morgan House

The Society holds a long lease (to 2109) from Bedford Estates on De Morgan House, 57-58 Russell Square, London, WC1. It uses these premises: (a) to house its administrative headquarters; (b) to hold its meetings and conferences in the promotion of mathematics; (c) to let out offices on the upper floors to other organisations on a commercial basis; and (d) for

function rooms which it lets to other organisations for their own purposes. This last category includes other mathematical and charitable organisations, where there is both a mathematical and financial benefit; discounts are available and some rooms are offered at either reduced rates or at no charge as part of the Society's charitable giving.

For most of 2020–21 the Conference Centre was closed due to Covid-19 restrictions and reopened in July 2021. Of the rooms available for commercial tenancies, one is unoccupied at the time of writing following a tenant vacating their office space in July 2021. The room is currently being advertised to find a new tenant.

LMS Website

The Society's website is a key part of its data management infrastructure. Using a Drupal Content Management System, which is underpinned by a CiviCRM database, the website is not only a channel for communicating the Society's activities but is also a key interface between the Society, its members and the mathematical community more broadly. It enables prospective members and grant holders to submit applications, it allows current members to manage and pay for their membership online, it provides a home for the UK Mathematical Sciences Directory and it allows audiences to register for Society events. Use of the website for these key business processes requires careful management and innovative design to ensure that the functionality benefits the Society and its stakeholders while protecting their data. In 2020–21, the Society undertook a major upgrade of the Drupal Content Management System and implemented a Society-wide review of the website content, to ensure that its website remains up-to-date and fit for purpose.

Statement of Trustees' Responsibilities

The trustees are responsible for preparing the Trustees' Report and the financial statements in accordance with applicable law and United Kingdom Accounting Standards (United Kingdom Generally Accepted Accounting Practice).

The law applicable to charities in England and Wales requires the trustees to prepare financial statements for each financial year which give a true and fair view of the state of the affairs of the charity and of the incoming resources and application of resources of the charity for that period. In preparing these financial statements, the trustees are required to:

- select suitable accounting policies and then apply them consistently;
- observe the methods and principles in the Charities' Statement of Recommended Practice (SORP);
- make judgements and estimates that are reasonable and prudent;
- state whether applicable accounting standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the charity will continue in business.

The trustees are responsible for keeping proper accounting records that disclose with reasonable

accuracy at any time the financial position of the charity and enable them to ensure that the financial statements comply with the Charities Act 2011, the Charity (Accounts and Reports) Regulations 2008 and the provisions of the Royal Charter. They are also responsible for safeguarding the assets of the charity and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

For and on behalf of the Council of the London Mathematical Society:

Professor Jonathan Keating
(President)

15/10/2021

Date

ANNEX 1: COUNCIL, EXECUTIVE TEAM AND PROFESSIONAL ADVISERS

Membership of Council during the period 1 August 2020 to 31 July 2021

President:	Jon Keating
Vice-Presidents:	Iain Gordon Cathy Hobbs
Treasurer:	Robert Curtis (until November 2020) Simon Salamon (from November 2020)
General Secretary:	Stephen Huggett (until November 2020) Robb McDonald (from November 2020)
Programme Secretary:	Chris Parker
Publications Secretary:	John Hunton
Education Secretary:	Kevin Houston
Members-at-Large:	Mark McCartney (Librarian) Peter Ashwin (from November 2020) Alexandre Borovik (until November 2020) Tara Brendle (until November 2020) Elaine Crooks Andrew Dancer Anne-Christine Davies (from November 2020) David E. Evans (until November 2020) Tony Gardiner Minhyong Kim (from November 2020) Niall MacKay (from November 2020) Frank Neumann Brita Nucinkis Richard Pinch (until November 2020) Mariya Ptashnyk (until November 2020) Anne Taormina Amanda Turner (from November 2020)
In attendance:	Eugenie Hunsicker (Chair, Committee for Women and Diversity in Mathematics)

Executive Management Team during the period 1 August 2020 to 31 July 2021

Executive Secretary:	Caroline Wallace
Head of Finance and Accounting:	Ephrem Abate
Head of Society Business:	Lindsay Walsh
Head of Conferences and Buildings:	Andrew Dorward

External advisors

Auditor:	Moore Kingston Smith LLP, Devonshire House, 60 Goswell Road, London, EC1M 7AD
Investment Advisers:	Cazenove/Schroder & Co. Limited, 12 Moorgate, London, EC2R 6DA
Bankers:	National Westminster Bank plc, 208 Piccadilly, London, W1A 2DG
Solicitors:	Bates Wells, 2-6 Cannon Street, London, EC4M 6YH

Registered address

London Mathematical Society, De Morgan House, 57-58 Russell Square, London, WC1B 4HS

<https://www.lms.ac.uk>

Charity registration number

252660

ANNEX 2: COMMITTEE MEMBERSHIP (as at July 2021)

Membership of Committees as at 31 July 2021

Computer Science Committee: P. Wong (Chair), P. Ashwin, A. Beckmann, M. Cryan, O. Dardha, J. Davenport (Institute of Mathematics and its Applications (IMA)), R. Heirons (British Computer Society-Formal Aspects of Computing Science (BCS-FACS)), C. Kestner, B. Martin, S. Zivny.

Development Committee: President (Chair), Treasurer, General Secretary, Executive Secretary, Past President, President Designate, G. Dales, A. Dancer, J. Rodrigo, C. Roney-Dougal.

Early Career Research Committee: C. Parker (Chair), J. Grbic, H. Johnston, D. Maclagan, R. Newton, M. Ptashnyk, S. Roy, I. Short, A. Thillaisundaram, S. Whitehouse.

Education Committee: Education Secretary (Chair), P. Glaister, Vice-President C. Hobbs, J. Anderson, J. Parker (Heads of Departments of Mathematical Sciences (HoDoMS)), J-A Lees, M. McCartney, T. Roper, C. Saker.

Finance and General Purposes Committee: President (Chair), Vice-Presidents, General Secretary, Treasurer, Programme Secretary, Publications Secretary, Education Secretary, Executive Secretary.

International Affairs Committee: President (Chair), Publications Secretary, C. Budd (UK representative to International Commission on Mathematical Instruction), J. Fraser (Edinburgh Mathematical Society (EdMS)), G. Gibson (President of the EdMS), P. Glaister (IMA), M. Mathieu, B. Nucinkis, J. Parker, S. Schroll, N. Walkey (Royal Statistical Society).

Investment Sub-Committee: Treasurer (Chair), all other Members of Finance and General Purposes Committee, R. Bogni, J. Dodd, G. Keniston-Cooper.

IT Resources Committee: President (Chair), Vice-President Hobbs, Executive Secretary, F. Clarke, J. Cremona, K. Gillow, I. Stewart.

Library Committee: Librarian (Chair), Publications Secretary, LMS Archivist, I. Falconer, S. Hart, C. Hollings.

Newsletter Editorial Board: A. Vdovina (Editor-in-Chief), J. Barrow-Green, D. Chillingworth, J. Enright, J. Fraser, J. Grbic, C. Hollings, A. Johansen, Vice-President C. Hobbs, N. MacKay, S. Oakes, A. Wade, M. Whittaker, A. Wilson, General Secretary.

Nominating Committee: K. Falconer (Chair), I. D. Abrahams, C. Budd, M. Kim (Council), B. Pelloni, M. Rees, G. Stallard, E. Winstanley.

Personnel Committee: Vice-President C. Hobbs (Chair), Publications Secretary, Executive Secretary, A. Belton, A. Taormina, N. MacKay.

Prizes Committee: President (Chair), J. Bennett, P. Cameron, C. Elliott, I. Gordon, S. Schroll, I. Smith, A. Taormina, B. Wingate, M. Wemyss.

Publications Committee: Publications Secretary (Chair), Vice-President C. Hobbs, Treasurer, M. Brown, E. Crooks, R. Kessar, A. Lazarev, I. Leary, N. MacKay, C. Parker, T. Sanders, S. Taylor, A. Turner.

Research Grants Committee: A. Dancer (Chair), J. Brodski, G. Derks, A. Lazarev, F. Neumann, B. Nucinkis, N. Peyerimhoff, M. Ptashnyk, A. Turner, A. Vdovina, J. Zimmer (Bath Symposia Representative).

Research Policy Committee: Vice-President I. Gordon (Chair), P. Ashwin, K. Brown, S. Gutierrez, A. Caraiani, J. van den Heuvel (HoDoMS), S. Howison, O. Jensen, T. Liverpool, H. Krieger.

Society Lectures and Meetings Committee: B. Nucinkis (Chair), M. Kambites, K. Leschke, N. Petrovskaya, M. Todd, V. Styles, A. Vdovina.

Committee for Women and Diversity in Mathematics: E. Hunsicker (Chair), Vice-President I. Gordon, H. Herrera (Operational Research Society, ORS), A. Lecuona (Edinburgh Mathematical Society, EdMS), A. Davis, S. Lombardo, D. Maclagan, S. Pumpluen, L. Rodgers (Royal Statistical Society, RSS), C. Smith, M. Sommacal.

Sub-Groups, Ad-hoc Committees and LMS appointments as at 31 July 2021

Publications Nominating Group: Publications Secretary (Chair), G. Brown, M. Gross, J. Maynard, A. Lazarev, M. Pollicott, U. Tillmann, C. Tretter.

Covid Working Group: Vice-President I. Gordon (Chair), Treasurer, B. Nucinkis (Chair, Society Lectures and Meetings Committee), A. Dancer (Chair, Research Grants Committee), C. Parker (Chair, Early Career Research Committee), A. Turner, Executive Secretary.

Education sub-committee (Teaching Mathematics as a Career): J. White (Chair), Education Secretary, K. Golden, T. Roper, C. Saker.

Good Practice Scheme Steering Group: A. Davis (Chair), P. Davies, E. Hunsicker (Chair, Women in Mathematics Committee), S. Lombardo, N. Mazza, C. Smith, A. Taormina, J. van den Heuvel (HoDoMS), J. Walker.

LMS–IMA Crighton Medal Committee 2020 (LMS Members): President, K. Brown, G. Stallard.

Mentoring African Research in Mathematics (MARM) Board: F. Neumann, A-S Kalaghiros, T. Liverpool, A. Madzvamuse, M. Roberts, B. Szendroi.

Undergraduate Summer School Scientific Committee: A. Hone, F. Kirwan, A. Veselov.

Council Diarist: B. Nucinkis, E. Crooks.

Council Webmaster: R. McDonald.

LMS/EMS Newsletter Correspondent: D. Chillingworth.

Election Scrutineers: C. Goldie and C. Lance.

ANNEX 3: EXTERNAL REPRESENTATIVES (as at July 2021)

Representatives on external committees and boards as at 31 July 2021

Athena Forum: Chair, Committee for Women and Diversity in Mathematics.

British Science Association Mathematics Section: Education Secretary.

British Mathematical Colloquium Scientific Committee: M. Devisscher, S. Rees, C. Roitzheim.

Council for the Mathematical Sciences Board: President, Vice-President C. Hobbs, Vice-President I. Gordon, Executive Secretary (any 3 of).

Council for the Mathematical Sciences-Engineering and Physical Sciences Research Council (CMS-EPSRC) Liaison Sub-Group: Vice-President C. Hobbs, Vice-President I. Gordon, Executive Secretary (any 2 of).

European Mathematical Society (EMS) Council: President, Programme Secretary, M. Mathieu, C. Roney-Dougal.

Heads of Departments of Mathematical Sciences Committee: J. Parker.

International Centre for Mathematical Sciences (ICMS) Programme Committee: C. Drutu, J. Gog.

International Commission on Mathematical Instruction (ICMI) UK representative: C. Budd.

Isaac Newton Institute (INI) Scientific Steering Committee: M. Harris, V. Isham.

Isaac Newton Institute (INI) Correspondent: B. Pelloni.

Joint Mathematical Council (JMC): Education Secretary.

Parliamentary and Scientific Committee: President, Vice-President I. Gordon, Vice-President C. Hobbs, Executive Secretary.

STEMM Disability Advisory Committee: Chair, Committee for Women and Diversity in Mathematics.

Teaching Training Scholarships Management Group: Education Secretary

ANNEX 4: STAFF

Staff in post in the period 1 August 2020 to 31 July 2021

Executive Secretary's Office

Executive Secretary:	Caroline Wallace
PA to the Executive Secretary:	Clare Ralphs
Head of Finance and Accounting:	Ephrem Abate
Accounts Assistant:	Valeriya Kolesnykova
Administrative Editor, LMS Newsletter:	Susan Oakes

Publications

Publications Development Manager:	Suzanne Abbott
Editorial Manager:	Ola Törnkvist
Publications Assistant:	Georgina Gale

Society Business

Head of Society Business:	Lindsay Walsh
Membership and Grants Manager:	Elizabeth Fisher
Society Communications Officer:	John Johnston
Society Governance Officer:	James Taylor
Society & Research Officer:	Katherine Wright
Grants and Membership Administrator:	Lucy Covington
Projects, Events & Membership Administrator/CMS Assistant	Tammy Tran (until April 2021)

Conferences and Building Group

Head of Conferences and Buildings:	Andrew Dorward
Events Administrator:	Abul Rashed (until January 2021)
Receptionist:	Valeriya Kolesnykova (acting as Membership Assistant due to the closure of De Morgan House during the Covid-19 pandemic) Angela Waidson (until January 2021)

ANNEX 5: GRANT SCHEMES

General policy on grant-making

The grant schemes are funded from the Society's resources received from its endowments, investments and publishing activities and are one of the primary mechanisms through which the Society achieves its central purpose, namely to 'promote and extend mathematical knowledge'. The principles governing its grant-giving are:

- As a charity the Society is able, and wishes, to take advantage of different opportunities and to work within a different regulatory framework from other funding bodies, such as the Engineering and Physical Sciences Research Council (EPSRC). Its grant schemes are focused accordingly.
- The Society's funds are under pressure, and it is not able to make awards as often or as fully as it would like.
- The Society does not normally meet the full cost of an activity. Rather it will aim to give added value to an event largely funded by other means, or to bridge the gap between cost and the resources that might reasonably be made available by a university department.
- The Society does not pay Full Economic Costs.
- The Society does not make grants to cover departmental overheads, secretarial costs, etc., which could be seen as part of normal departmental provision.
- The Society does not normally make grants to cover room hire, although consideration will be given to cover room hire charges at De Morgan House.
- Applicants are expected to make economical travel arrangements where possible.
- The Society expects that organisers of conferences and activities who are seeking grants from the Society will invite both male and female speakers (or explain why this is not appropriate or possible) and give consideration to the provision of mechanisms to enable participation by people with children or family responsibilities, in line with the Society's policy on Women in Mathematics.
- The Society will not allow its limits for individual grant schemes to be exceeded by artificially sub-dividing an application into a number of separate requests under different headings.
- The Society considers it to be the responsibility of the institution to which the grant is paid to check receipts in accordance with its normal financial procedures.

The Society's committees that assess applications for grants are made up of mathematicians with a wide spread of research interests. Under most schemes, proposals are judged by the committees themselves, although they may seek advice. Each committee judges each application on its merits.

Any mathematician working in the UK is eligible to apply for a grant but for some schemes if they are not a member of the Society, then the application must be countersigned by a member who is prepared to support the application.

Summary of main grants and training schemes

Conference Grants (Scheme 1)

Grants are made to the organisers of conferences to be held in the UK. Priority is given to the support of meetings where an LMS grant can be expected to make a significant contribution to the viability and success of the meeting. Support of larger meetings of high quality is not ruled out, but for such meetings an LMS grant will normally cover only a modest part of the total cost.

Visitors to the UK (Scheme 2)

The aim of the Scheme is to provide grants to mathematicians based within the UK to partially support visitors to the UK; the visitors are expected to give lectures in at least three separate institutions.

Support of Joint Research Groups (Scheme 3)

The Scheme is to provide support for groups of mathematicians, working in at least three different locations (of which at least two must be in the UK), who have a common research interest and who wish to engage in collaborative activities. The grant award covers two years, and is expected that a maximum of four meetings (or an equivalent level of activity) will be held per academic year.

Online Lecture Series (Scheme 3)

The Scheme is to provide support for the early career researchers in the Joint Research (Scheme 3) Groups who do not have permanent positions. The Groups are required to produce online lectures aimed at new PhD students in September 2020. This will enable current early career researchers to enhance their skills and experience in planning and delivering online lectures.

Research in Pairs (Scheme 4)

The Scheme is to provide small grants to UK-based mathematicians to help support short visits of intensive collaborative research with colleagues in other institutions, both in the UK and abroad.

Research Reboot (Scheme 4)

This scheme is to help restart research activity. It offers funding for the applicant to leave their usual environment to focus entirely on research for a period from two days to a week, in order to restart their research activity, if they have been prevented from doing so by the adverse conditions of the Covid-19 crisis.

Collaborations with Developing Countries (Scheme 5)

The Scheme is to provide grants to mathematicians within the UK to support visits for collaborative research, or academic activities that will benefit the country concerned. Countries considered to be eligible for Scheme 5 funding are those contained within (but not exclusively limited to) the International Mathematical Union Commission for Developing Countries (IMU CDC) Definition for Developing Countries: <https://www.mathunion.org/cdc/about-cdc/definition-developing-countries>

Workshop Grants (Scheme 6)

The Society supports research workshops, which may be held anywhere in the UK and are an opportunity for a small group of active researchers to work together for a concentrated period on a specialised topic. Applications to support the development of research in an area not ready for a larger-scale application are welcomed; applications for partial support for larger events will only exceptionally be supported.

Computer Science Small Grants (Scheme 7)

The aim of the Scheme is to provide small grants to researchers based within the UK to help support visits for collaborative research at the interface of Mathematics and Computer Science.

British Colloquium for Theoretical Computer Science

The Society supports the annual meeting which provides a forum in which researchers in theoretical computer science can meet, present research findings, and discuss developments in the field. Specifically, the Society funds the costs of a speaker who is ordinarily from overseas and who is introduced as the 'LMS Keynote Lecturer in Discrete Mathematics'.

Caring Supplementary Grants

The Society recognises that parents and carers are sometimes prevented from attending conferences and meetings and making research visits because there is no provision for the extra costs incurred in caring for dependants. It is the LMS' view that institutions should make provision for caring costs but, while this is not largely the case, the Society is willing to make a supplementary grant as a contribution to the costs.

Grace Chisholm Young Fellowship

These fellowships aim to provide some support when a mathematical career is interrupted by family responsibilities, relocation of partner, or other similar circumstance, making possible some continuous mathematical activity and so enabling the fellow to be in a position to apply for posts when circumstances allow. Each holder will be based in a specific Mathematics Department in a University or Research Institute in the UK; the host is expected to provide an email address, use of library and IT facilities and access to research literature. The normal duration of a fellowship is one year.

Emmy Noether Fellowships

These Fellowships are designed to enhance the mathematical sciences research, broadly construed, of holders, either re-establishing their research programme after returning from a major break associated with caring responsibilities or those requiring support to maintain their research programme while dealing with significant ongoing caring responsibilities.

Small Educational Grants

These grants support such activities as popular lectures, exhibitions, masterclasses, mathematical competitions, etc., that help to encourage joint mathematical ventures between higher education institutions and schools, or the development of projects that would improve the public image of mathematics.

Mathematics Teacher Continuing Professional Development (CPD) Grants

The Scheme is to provide opportunities for mathematics teachers to attend training which is specifically mathematical. Any application for a grant under this scheme must be made by a teacher of mathematics or Initial Teacher Education provider based in the UK. The grants are open to teachers of mathematics from primary school to A-Level or equivalent.

The grants are to support teacher attendance at one or two day conferences/events organised by professional mathematical organisations. The grants are also to assist providers of professional development to run conferences and courses that allow participants to further their professional development. The grants can also cover the costs of external trainers in schools or educational institutions.

Mentoring African Research in Mathematics (MARM)

The aim of the programme is to enable all mathematicians in Africa to pursue academic careers of the highest standard. The Society believes that enhancing and developing academic research and research institutions in Africa will help ensure that pursuing world-class mathematical careers within Africa will be both achievable and a more attractive option than moving permanently to the developed world. Over time, the strengthening of the mathematical community within Africa will benefit not only the African community but mathematics as a whole. Grants are awarded for two-year academic partnerships between European and African institutions for activities including exchange visits, lectures and workshops, conferences, PhD supervision and mentoring support.

Support for Mathematics in Africa

The Society awards grants to contribute to the travel costs of postgraduates attending conferences in Africa, organised or supported by the African Mathematics Millennium Science Initiative (AMMSI).

Atiyah UK–Lebanon Fellowships

This scheme was set up in memory of Sir Michael Atiyah (1929–2019) and operated in partnership with the Centre for Advanced Mathematical Sciences at the American University of Beirut. It provides for an established UK based mathematician to visit the Lebanon as an Atiyah Fellow for a period of between one week up to 6 months, or alternatively for a mathematician from the Lebanon of any level, in particular promising advanced level students from the AUB, to visit the UK to further their study or research for a period of up to 12 months.

Summary of grants and training schemes supporting Young Mathematicians and Early Career Researchers

Undergraduate Research Bursaries in Mathematics

The Scheme aims to give training in research to undergraduates with research potential to encourage them to consider a career in scientific research. Grants are awarded for a six-to-eight week summer research project undertaken with the guidance of a research supervisor.

Undergraduate Summer Schools

The goal of the Summer Schools is to introduce exceptional pre-final year undergraduates to research mathematics and, in particular, to make them think seriously about an academic career at this stage. The Summer Schools are a combination of short lecture courses with problem-solving sessions and colloquium style talks. Talks are given by lecturers mostly (though not exclusively) from the UK, including high-profile speakers. The Schools are for around 50 students and involve 10 lecturers. The event is hosted by a UK university for a period of 10 days in summer.

LMS Prospects in Mathematics

The Society provides support for this annual event, primarily for final year undergraduates and Masters' Students who are considering applying for a PhD after they have completed their studies to discuss current research and potential career opportunities.

LMS Research Schools Programme

The purpose of the Research Schools is to provide training for young researchers in a core area of mathematics. Students and post-docs can meet a number of leading experts in the topic as well as other young researchers working in related areas. The series aims at the highest international standing of these research schools, allowing for support of both international lecturers and participants. The main criteria for funding are the topicality and the mathematical significance of the course material, the general alignment with the mission of the LMS) and the likely demand for places nationally and internationally, and the standing of the proposed lecturers in the international mathematical community.

Cecil King Travel Scholarship

The London Mathematical Society administers two £6,000 travel awards funded by the Cecil King Memorial Foundation for early career mathematicians, to support a period of study or research abroad, typically for a period of three months. One Scholarship will be awarded to a mathematician in any area of mathematics and one to a mathematician whose research is applied in a discipline other than mathematics.

Postgraduate Research Conferences (Scheme 8)

The aim of this Scheme is to support postgraduate research conferences, organised by and for postgraduate research students, to be held in the UK.

Young Researchers in Mathematics Conference

The Society provides a grant for the Young Researchers in Mathematics Committee to help support the Young Researchers in Mathematics Conference, a mathematics conference specifically targeting early career researchers.

LMS Early Career Fellowships

To support early career mathematicians in the transition between PhD and a postdoctoral position, the London Mathematical Society offers up to 8 Fellowships of between 3 and 6 months to mathematicians who have recently or will shortly receive their PhD. The award will be calculated at £1,200 per month plus a travel allowance. The fellowships may be held at one or more institutions but not normally at the institution where the fellow received their PhD.

LMS Early Career Fellowships (Covid-19 Response)

Recognising that one impact of the Covid-19 pandemic on Early Career Researchers is the unexpected turbulence in the job market, to support early career mathematicians in the transition between positions, the London Mathematical Society offers a number of Early Career Fellowships of between 3 and 6 months to mathematicians who have recently or will shortly receive their PhD. The award will be calculated at £1,000 per month and offers no travel allowance. An additional scholarship of approximately £1,000 (dependent on uptake) is also available and funded by the HIMR.

Celebrating New Appointments (Scheme 9)

Grants are made to provide partial support for meetings held in the UK to celebrate the appointment of a new lecturer in mathematics at a UK institution. The aim of the grant award is to embed the new lecturer in their home institution and the local mathematical community, and to allow the new appointment to create useful and lasting relationships with the local mathematical community. It is expected that the new appointment themselves will present a lecture at the meeting.

Travel Grants for Early Career Researchers

The Travel Grant Scheme provides partial support for UK-based early career researchers to attend conferences or undertake research visits either in the UK or overseas. Grant holders are early career researchers in mathematics, based in the UK, defined as a Masters student, PhD/research student or anyone who has completed their PhD in the last five years (excluding academic career breaks). The scheme is open to both members and non-members of the LMS.

Women in Mathematics Events

These events are aimed at academic mathematicians (from at least postgraduate level and up and may include undergraduates). The events are intended to help early career women mathematicians when considering the next stages in their careers and typically have included mathematical talks combined with panel discussions, social opportunities and networking. Individuals or groups are able to express interest in organising and hosting an event.

Girls in Mathematics Events

Events are aimed at schoolgirls, up to and including A-levels or equivalent, with mathematics as a main focus. Individuals or groups are able to express interest in organising and hosting an event.

Diversity in Mathematics Events

Diversity in Mathematics Days support aspects of diversity beyond gender. Two such days will be supported each year. The events are expected to focus on some aspect of diversity in the Mathematical Sciences. One of the events is expected to feature both the work of people in the Mathematical Sciences, whether in industry or academia, who come from that diversity group, and also offer opportunities for mathematicians from that diversity group to receive mentoring and networking opportunities. For the first time the London Mathematical Society will also support a Diversity in Mathematics Day in schools. One such day will be supported each year that encourages racially diverse students to become more involved in mathematics. The event will be aimed at school students up to and including A-level or equivalent. Individuals or groups are able to express interest in organising and hosting these events.

ANNEX 6: RESERVE FUNDS

For the purposes of financial planning the Society has chosen to define Relevant Funds to consist of Quoted Investments + Residential Properties + Cash at bank. The Society is in the process of rebuilding the investment portfolio and guaranteeing a real return, hence the aim of inflation + 4% as the primary long term target. In order to maintain its value in real terms, Council considers that the present level of the Relevant Funds should (if possible) be increased to at least £20m by 2025. At present Residential Properties are making a return of 4% through rent, and more than keeping pace with inflation.

The Society normally maintains £600k free reserve (operating reserve) cash at bank to ensure that there is enough working capital to stabilise the Society's finances by providing contingency against unexpected events, as well as to handle losses in income and large unbudgeted expenses.

General Fund

The General Fund is to provide for the general operation of the Society including its charitable activities not funded from Designated or Restricted Funds. Within the Society's reserves, the General Fund is deemed an expendable reserve to be used in pursuit of the Society's objectives as Council may from time to time determine. At present the fund exists to assure the availability of resources for the Society's grant schemes and other continuing charitable activities in future years. This manages the risk to the Society's ability to generate income to provide for such activities and offers a contingency against threats such as open access.

General Fund	£15,523,529
--------------	--------------------

Building and Development Reserve Fund

This reserve, originally built up for the Society to purchase or rent its own property was utilised in part in the purchase of a leasehold property. This reserve fund exists to maintain the property in a state of good repair as required by the Lease holder, including in the case of disaster recovery should any major incident affect the physical aspects of the Society's offices. The agreed purposes and recommended levels as from the next financial year would be:

Rehousing and re-establishing the administration for one year should De Morgan House (DMH) to be lost through fire etc	£195,000
Costs of venue hire for all LMS meetings held in DMH	£15,000
Costs of re-establishing our work	£13,000
Dilapidations, were the Society to leave DMH	£23,000
External and Internal redecoration	£79,000
Major modifications and developments, unexpected repairs/replacement	£275,000
	£600,000

Publication Reserve Fund

This fund is to provide a reserve to meet the costs of producing and publishing the Society's LMS journals, including where the Society's income from these journals is unable to cover such commitments. It is intended that the reserve will be reviewed as circumstances arise each year. The agreed purposes and recommended levels are:

Repaying subscriptions income if we ceased to trade, and other commitments	£1,725,000
Buffer against over/under shooting the budget	£175,000
New ventures. Based on the costs of launching and producing a new journal	£750,000
Special strategic and commercial initiatives	£75,000
Insurance against breach of copyright and libel (including legal fees)	£275,000
	£3,000,000

Grants Payable Reserve Fund

This fund is set aside for grant awards to mathematical projects or activities which span a number of years. Such grants are reviewed annually and are paid once the recipient of the grant has provided a progress report with satisfactory performance of the project.

Grants awarded and approved by Council to be paid in future accounting periods	£21,000
--	----------------

Covid-19 Emergency Fund

This fund is set aside to help mitigate the impact of the Covid-19 pandemic on mathematical research, including the 'people pipeline' of early career researchers	£27,251
---	----------------

Restricted Funds

Prizes Fund (for Berwick/De Morgan/ Lord Rayleigh's/ Fröhlich/ Shephards prizes)	£215,484
A.J. Cunningham Research Fund (for publication of work on the factorisation of large numbers)	£102,807
Zeeman Fund (for Undergraduate Research Bursaries named in honour of Prof. Sir Christopher Zeeman)	£221
Frank Gerrish Fund (for promotion of expository articles and surveys within the Society's publications)	£29,791
Levelling Up Scheme Fund (for tutorial of A-level maths students from under-represented backgrounds)	£41,316
Campaign for Pure Mathematics Fund (for campaigning to protect and promote pure mathematics)	£26,760
	£416,379

ANNEX 7: AUDITOR'S REPORT

Opinion

We have audited the financial statements of The London Mathematical Society for the year ended 31 July 2021 which comprise the Statement of Financial Activities, the Balance Sheet, the Cash Flow Statement and notes to the financial statements, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including FRS 102 'The Financial Reporting Standard Applicable in the UK and Republic of Ireland' (United Kingdom Generally Accepted Accounting Practice).

In our opinion the financial statements:

- give a true and fair view of the state of the charity's affairs as at 31 July 2021, and of its incoming resources and application of resources, for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of the Charities Act 2011.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs(UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the audit of the financial statements section of our report. We are independent of the charity in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the trustees' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the charity's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the trustees with respect to going concern are described in the relevant sections of this report.

Other information

The other information comprises the information included in the annual report, other than the financial statements and our auditor's report thereon. The trustees are responsible for the other information. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matters where the Charities Act 2011 requires us to report to you if, in our opinion:

- the information given in the Trustees' Annual Report is inconsistent in any material respect with the financial statements; or
- the charity has not kept adequate accounting records; or
- the financial statements are not in agreement with the accounting records and returns; or
- we have not received all the information and explanations we required for our audit.

Responsibilities of trustees

As explained more fully in the trustees' responsibilities statement set out on page 27, the trustees are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the trustees determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the trustees are responsible for assessing the charity's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the trustees either intend to liquidate the charity or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

We have been appointed as auditor under section 144 of the Charities Act 2011 and report in accordance with regulations made under section 154 of that Act.

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

The objectives of our audit in respect of fraud, are; to identify and assess the risks of material misstatement of the financial statements due to fraud; to obtain sufficient appropriate audit evidence regarding the assessed risks of material misstatement due to fraud, through designing and implementing appropriate responses to those assessed risks; and to respond appropriately to instances of fraud or suspected fraud identified during the audit. However, the primary responsibility for the prevention and detection of fraud rests with both management and those charged with governance of the charity.

Our approach was as follows:

- We obtained an understanding of the legal and regulatory requirements applicable to the charity and considered that the most significant are the Charities Act 2011, the Charity SORP, and UK financial reporting standards as issued by the Financial Reporting Council.
- We obtained an understanding of how the charity complies with these requirements by discussions with management and those charged with governance.
- We assessed the risk of material misstatement of the financial statements, including the risk of material misstatement due to fraud and how it might occur, by holding discussions with management and those charged with governance.

- We inquired of management and those charged with governance as to any known instances of non-compliance or suspected non-compliance with laws and regulations.
- Based on this understanding, we designed specific appropriate audit procedures to identify instances of non-compliance with laws and regulations. This included making enquiries of management and those charged with governance and obtaining additional corroborative evidence as required.

As part of an audit in accordance with ISAs (UK) we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purposes of expressing an opinion on the effectiveness of the charity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the trustees.
- Conclude on the appropriateness of the trustees' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the charity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the charity to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Use of our report

This report is made solely to the charity's trustees, as a body, in accordance with Chapter 3 of Part 8 of the Charities Act 2011. Our audit work has been undertaken so that we might state to the charity's trustees those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to any party other than the charity and charity's trustees as a body, for our audit work, for this report, or for the opinion we have formed.

1. Accounting Policies

The accounting policies adopted by the Society are as detailed below:

a) **Basis of accounting**

The financial statements have been prepared in accordance with Accounting and Reporting by Charities: Statement of Recommended Practice (SORP) applicable to charities preparing their accounts in accordance with the Financial Reporting Standard applicable in the UK and Republic of Ireland (FRS 102) (effective 1 January 2015) and the Charities Act 2011.

The London Mathematical Society meets the definition of a public benefit entity under FRS 102. Assets and liabilities are initially recognised at historical cost or transaction value unless otherwise stated in the relevant accounting policy note(s).

The trustees have assessed whether the use of going concern basis is appropriate and have considered possible events or conditions that might cast significant doubt on the ability of the Society to continue as a going concern. The trustees have made this assessment for a period of at least one year from the date of approval of the financial statements. In particular, the trustees have considered the impact of COVID-19 pandemic and the forthcoming reduction in the Society's income from its publications activities.

In relation to the pandemic, the conference income from De Morgan House continues to be affected, with restrictions preventing in-person events for a significant part of the 2020-2021 year and a lag in the return to in-person events after restrictions were lifted in July 2021. This is partly mitigated by anticipated cost savings due to changes in levels of activity in some areas. For example, it is likely that there will continue to be fewer applications than usual for certain grant schemes and some events will continue to take place online rather than face-to-face. The Society's staff largely worked from home from March 2020 until July 2021. Since July 2021, the lifting of government restrictions has allowed a return to more in-person working at De Morgan House. The Society's core operations have been able to continue throughout this period.

As noted earlier in this report, the Society is set to lose a significant part of its income from its publications activities soon. Council is actively exploring other sources of income. Pending the development of additional income streams, Council has reviewed all the Society's activities in order to identify savings and decided on reductions in its budget for the 2021-2022 financial year accordingly. On this basis, and the level of reserves held, the trustees consider that the Society has adequate resources to continue in operational existence for the foreseeable future. The Society therefore continues to adopt the going concern basis in preparing its financial statements.

The financial statements are prepared in sterling, which is the functional currency of the company. Monetary amounts in these financial statements are rounded to the nearest pound.

b) **Judgements and key sources of estimation uncertainty**

In the application of the Society's accounting policies, the trustees are required to make judgement, estimates and assumptions about the carrying amount of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from the estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised where the revision affects only that period, or in the period of the revision and future periods where the revision affects both current and future periods.

The most significant estimates and assumptions which affect the carrying amount of assets and liabilities in the accounts relate to:

- Useful Economic Lives- The annual depreciation charge for property, fixture, fittings and equipment is sensitive to change in the estimated useful economic lives and residual value of assets. These are reassessed annually and amended where necessary to reflect current circumstances.
- Defined benefit scheme pension liability can be estimated based on recommended modeller provided by USS. For more details, see note 14.
- Fair value of residential properties is reassessed annually based on local agents estimates.

1. Accounting Policies (continued)

c) Financial Instruments

The Society has elected to apply the provision of Section 11 'Basic Financial Instrument's and Section 12 'Other Financial Instruments Issues' of FRS 102 to all of its financial instruments. Financial Instruments are recognised in the Society's balance sheet when the Society becomes party to the contractual provisions of the instrument. Financial assets and liabilities are offset, with the net amounts presented in the financial statements, when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or to realise the asset and settle the liability simultaneously.

With the exceptions of prepayments and deferred income all other debtor and creditor balances are considered to be basic financial instruments under FRS 102. (See notes 18 and 19 for details)

d) Members' Subscriptions

Subscription income from members is recognised in the year to which it relates. During the year new members are allowed to pay pro-rata subscription fees depending on when they are elected during the membership year.

e) Donations

Cash donations are credited to the General Fund in the year of receipt but donations in kind are not recognised in these financial statements.

f) Fixed Assets

Depreciation is provided on all tangible fixed assets at rates calculated to write off, on a straight-line basis, the cost less estimated residual value over their expected useful lives as follows:

Leasehold Property	Over 50 years
Fixtures, Fittings and Office Equipment	20%
Computer equipment	33.33%

The Society operates a policy of capitalising assets whose unit cost exceeds £1,000, with expenditure below this level written off as incurred.

g) Investments

The Society may invest up to 30% of its relevant assets in residential property, as valued at the time of purchase, with the remainder given over to the Society's investment managers. Investment in such residential property will be directly managed by the Society rather than by the investment managers. The percentage calculation excludes the value of De Morgan House, though this could be reviewed at any point. Also excluded are any investments made by the investment managers in the property area of asset classes.

• Quoted investments

All quoted investments are valued at their market value at the balance sheet date, giving rise to unrealised gains and losses which are included in the Statement of Financial Activities. The market value is determined as follows:

- i) Listed securities are valued at mid-market value ruling at the balance sheet date;
- ii) Unit trust and managed fund investments are stated at the mid-point of the latest prices quoted by the investment managers immediately prior to the balance sheet date;
- iii) Investments held in foreign currencies have been valued on the relevant basis and translated into sterling at the rate ruling at the balance sheet date.

The portfolio is invested in a range of equity, cash and fixed-interest investments in both UK and overseas markets. The key objective of the Society's portfolio is to produce a real return (capital growth) of at least 4% pa, and to provide an investment income determined by 'total return policy' of 3.5% pa (based on Yale model).

The Society in its total returns policy treats all cash withdrawals from the investment portfolio as investment income. This is analysed in the notes to the financial statements as investment income split between the various categories of investment based on information provided by the investment managers and the proportion of total return drawn down relating to gains. The balance of unrealised gains and losses on revaluation of investments, and realised gains and losses arising on disposal of investments are separately identified in the notes to the Financial Statements and on the SoFA.

• Residential property investment

As a safeguard against possible poor performance of the stock exchange, the Society expanded its investments portfolio to include residential property and now owns seven long lease residential properties (four in Central London and three in the Birmingham area), all of which are rented out. The rental derived is shown on the SoFA under 'Investment Income'. The growth in the value of the Society's residential property investment will be shown in the SoFA as Gains on investment assets. The primary long-term target of the Society's residential property is to produce a yield of 4% pa and to increase in capital value by at least the rate of inflation. The residential property investment is valued at balance sheet date using the local estate agent's guidance on the current housing market within the area where the properties are located.

1. Accounting Policies (continued)

h) Publications

- i) Publications income from LMS journals is recorded based on an estimated accrued basis; other publications income is treated on a cash basis which is considered to be the most appropriate and prudent approach given the information available.
- ii) Income from the Society's contracts with publishers for the production, distribution and sales of its journals is determined as the best estimate for that proportion of the income (i.e. subscriptions less costs of production, distribution, sales and commission) relating to the number of issues published before the Balance Sheet date.
- iii) No account has been taken of costs incurred or sales proceeds received in respect of publication after the Balance Sheet date.
- iv) No valuation for accounting purposes is taken of any stocks of publications unsold at the Balance Sheet date.
- v) The cost of publishing rights and subscribers' lists are written off in the year of acquisition.
- vi) Royalties are taken into the Statement of Financial Activities as declared due by the relevant publishers.

i) Joint Ventures

The results of joint ventures are included in the accounts up to the year- end indicated.

j) Grants and Contracts

The Society has been awarded contracts and grants for some of its activities. These comprise: a contribution from IMU to support mentoring activities for mathematicians in Africa; shared costs of some activities with sister societies. The income and expenditure relating these are handled through this Fund.

k) Recognition of grant liabilities

Where the Society has contractual or constructive obligations to make grant payments these amounts are accrued in the accounts in accordance with the requirements of the SORP. The liability will be recognised within the year the grant is awarded. The unpaid grant commitments should normally be claimed by the end of the following financial year. However, the claim period may need to be extended for a further year (award year + 2) if the grant cannot be claimed by the end of the year following the award due to constraints on the start or end date of a grant, or due to other circumstances outside the control of the Society.

The Society also awards some grants with conditions for payment being a specific level of service or specific output to be delivered. Such grant awards (commitments) will be reserved in the Designated funds, and the grants are only recognised in the SoFA once the recipient of the grant has provided evidence of the specific service or output. Such grants are therefore reviewed annually and the grant payments subject to the condition of a progress report with satisfactory performance. If the project spans a number of years and satisfactory progress reports are received after year one, the first stage of the grant will be released from the Designated fund and that part of the grant expenditure will be recognised in the SoFA at that point.

Grants unclaimed by the end of award year +2 will be released back to the Society's general funds.

l) Grants payable

Grants payable out of existing revenues are provided for in full in the accounts. Those payable out of future resources are held in the Grant payable Reserve Fund (see also note '1j')

m) Taxation

The Society is a registered charity and no liability to taxation arises on the results of its business activities in support of its charitable purposes.

The Society has partial exempt status in respect of VAT, based on the split of its business and non-business activities. The proportion of VAT that cannot be recovered because of partial or fully exempt status of the activity is redistributed to the activities. The basis on which irrecoverable VAT have been allocated to the activities are set out in note 12.

n) Foreign currencies

Monetary assets and liabilities denominated in foreign currencies are translated at the rate of exchange ruling at the Balance Sheet date. Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. All differences are taken to the Statement of Financial Activities.

o) Medals in stock

The medal stock for the prize is stated at the lower of cost and net realisable value.

1. Accounting Policies (continued)

p) **General Fund**

The Unrestricted reserves are analysed between the General Fund and other Designated Funds. The General Fund, detailed in note 21 to the financial statements, is to provide for the general operation of the Society including its charitable activities not funded from Designated or Restricted Funds. Within the Society's reserves the General Fund is deemed an expendable reserve to be used in pursuit of the Society's objectives as Council may from time to time determine. At present it is managed to provide the income to be used to ensure the availability of resources for its grant schemes and other charitable activities in future years.

q) **Designated Funds**

The Unrestricted reserves are analysed between general and designated funds. The Trustees have created the following designated funds:

(i) **Building & Development Reserve Fund**

This reserve is to meet the costs of (a) consequences of the temporary loss of De Morgan House, (b) periodic internal and external decoration and maintenance, (c) major modifications or repairs.

(ii) **Publication Reserve Fund**

This reserve is to meet the costs of (a) breaches of copyright or libel actions against the Society, (b) special strategic and commercial initiatives (c) exploration and start-up costs of new ventures (d) consequential costs should the Society to cease publishing, (e) unpredictable annual fluctuations in the surplus.

(iii) **Grants Payable Reserve Fund**

This fund has been established to cover grants awarded and approved by Council to be paid in future accounting periods, subject to available finance and satisfactory report.

(iv) **COVID-19 Emergency Fund**

This fund is set aside to help mitigate the impact of the COVID-19 pandemic on mathematical research, including the 'people pipeline' of early career researchers.

(v) **Compositio Fund**

This fund holds the transaction relating to, and any year-end excess of income over expenditure, relating to the Society's joint venture with the Foundation Compositio to produce the journal Compositio.

r) **Restricted Funds**

The income of these restricted funds is to be used for the following purposes:

i) **The Berwick Prize Fund** - To support the Annual prize for mathematical work published by the Society

(ii) **De Morgan Medal Fund augmented by the Sir Joseph Larmor Prize Fund** - To support the award of the De Morgan Medal and the Larmor Prize, awarded every three years.

(iii) **Lord Rayleigh's Fund** - To support the general activities of the Society.

(iv) **J. H. C. Whitehead Prize Fund** - To support the cost of the Annual prizes awarded for lecturing and mathematical work.

(v) **Fröhlich Fund** - To support the cost of the Annual prizes awarded for lecturing and mathematical work.

(vi) **Shephards Prize Fund** - To support mathematics with a strong intuitive component which can be explained to those who have little or no knowledge of university mathematics.

(vii) **A. J. Cunningham Research Fund** - To support the cost of publication of work on the factorisation of large numbers.

(viii) **Zeeman Fund** - To support the cost of Undergraduate Research Bursaries named in honour of Professor Sir Christopher Zeeman.

(ix) **Frank Gerrish Fund** - To support the cost of promotion of expository articles and surveys within the Society's publications.

(ix) **Emmy Noether Fellowships Fund** - To support those re-establishing their research after a break or ongoing caring responsibilities.

(xi) **Campaign for Pure Mathematics Fund** - To support the cost of a public campaign to protect and promote pure mathematics.

(xii) **Levelling Up Scheme** - To help cover the costs of the Society's work on a pilot online tutorial scheme for A-level maths students from under-represented backgrounds.

(xiii) **Heilbronn Institute for Mathematical Research (HIMR) Fund** - To contribute to the costs of various Society grant giving activities including in support of undergraduates & early career researchers.

1. Accounting Policies (continued)

s) Support and governance costs

Support costs are those functions that assist the work of the charity but do not directly undertake charitable activities. Support costs include back-office costs, finance, personnel, payroll and governance costs which support the Society's Mathematical Sciences programmes and activities. The Governance costs include external audit, legal advice and the costs of trustee and committee meetings, as well as costs associated with constitutional and statutory requirements. Support and governance costs have been allocated between the costs of raising funds and charitable activities. The bases on which support and governance costs have been allocated to activities are set out in note 12.

t) Employee benefits

Termination benefits are recognised immediately as an expense when the Society is demonstrably committed to terminate the employment of an employee through, for example, redundancy, or to provide termination benefits.

u) Heritage assets

The Society holds an archive of historical material, known as the LMS Archive. The purpose of the Society's Archive is to provide a permanent historical record of the activities of the London Mathematical Society. The Society's Archive also provides protection for other significant material relating to mathematics in the UK that might otherwise be lost or destroyed, for the purposes of bibliographic reference and further study by historians of mathematics. No value is attributed to the Archive in the financial statements. From time to time, items may be added to the Archive and again no value is attributed to these items in the financial statements. The cost of regular valuations of items in the archive would not be justified.

2. Investment Income

The Society was involved in the following publishing ventures in the year:

- (I) ***Nonlinearity*** – the journal co-owned with the IOP Publishing Ltd and is produced at the IOP Publishing Ltd, Temple Circus, Temple Way, Bristol BS1 6HG
- (II) The three translation journals ***Russian Mathematical Surveys, Sbornik: Mathematics and Izvestiya: Mathematics*** are owned and managed jointly by the Department of Mathematics Russian Academy of Sciences, Turpion Ltd and the LMS. The main business address is Turpion Ltd, c/o IOP Publishing Ltd, Temple Circus, Temple Way, Bristol BS1 6HG.
- (III) The journal ***Transactions of the Moscow Mathematical Society (TMMS)*** is managed on a day-to-day basis at the American Mathematical Society, 201 Charles Street, Providence, RI 02904 - 2294, USA.
- (IV) ***Compositio Mathematica*** – the journal is wholly owned by Foundation Compositio Mathematica & managed by the LMS.
- (V) ***Mathematika*** – the journal is wholly owned by UCL and managed by the LMS.

Total 2020	631,621	322,521	293,208	311,053	1,558,403

Basis of apportionment

Support costs include (a) **Staff costs** (salaries, benefits, training, H&S, recruitment, etc. of staff directly attributable to each of the above Society's activities); (b) **General Office Costs** (rent, rates, services, cleaning, equipment, maintenance, telephones, postage, equipment, stationery, etc., depreciation and Irrecoverable VAT, and IT costs such as computer hardware and software, network, internet access, websites, software development, etc.), (c) **General management and finance** (cost of services that cannot be directly attributed to an activity, i.e. general accounting and financial controls, HR and Executive Secretary's general management, etc.) (d) **Governance costs** (costs of meetings, trustees' expenses, and costs associated with constitutional and statutory requirements).

The costs of these are attributed across all the activities of the Society in proportion to (a) salary or f.t.e., (b) space occupied in De Morgan House, and (c) f.t.e. respectively, based on a time analysis undertaken by all staff.

12. Allocation of support and governance costs by activity (continued)

Support and governance costs have been allocated between the costs of raising funds and charitable activities as:

- **Direct staff costs** = staff time directly attributable to each of the above Society's activities in proportion to the salary or pro rata to staff f.t.e. on a time analysis undertaken by all staff.
- **General Office costs** = (a) apportioned Building, Office and IT costs of staff who are directly attributable to (deal with) each of the above Society's activities as per staff time analysis and in proportion of the office space occupied, and (b) indirect costs, which are re-apportioned staff costs for those dealing with Building, Office and IT management.
- **General management and finance** = the costs of services that cannot be directly attributed to an activity (i.e. general accounting and financial controls, HR and Executive Secretary's general management, etc.) are attributed to each area of activity on the same basis as the original elements (i.e. staff time and space occupied, IT and office use etc.) , which includes re-apportioned costs of the office space occupied, the IT costs and other general office costs in dealing with HR, finance and general management.
- **Governance and committee costs** = apportionment made on the basis of (a) salary or pro rata to staff F.T.E. on a time analysis undertaken by all staff (b) meetings and staff office space occupied in De Morgan House in relation to governance and committee functions, and (c) Invoices and claims for catering, accommodation, travel and subsistence regarding governance and committee meetings, as well as costs of professional services (i.e. external audit, legal advice, etc.).

The Society has partial exempt status in respect of VAT, based on the split of its business and non-business activities. The proportion of VAT that cannot be recovered because of partial or fully exempt status of the activity is redistributed to the activities on the same basis as the original elements (i.e. staff time and space occupied, IT and office use etc.), under General Office costs.

Support costs for each area of the above activities can be higher or lower than last year due to staff time allocation. This changes from year to year and will have an effect on direct staff costs, general office costs, general management costs and governance costs.

13. Employment Costs	2021	2020
	£	£
Total employment costs of all staff including taxable benefits for the year comprise:		
Salaries and Wages	782,856	804,755
Redundancy *	20,827	-
Employer's National Insurance Contributions	87,819	89,341
Employer's Pension Contributions	152,379	150,202
Total	1,043,881	1,044,298

* This represents the cost of making redundancies as a result of reduced labour requirements as a consequence of the pandemic.

A government furlough grant of £16,849 was received. The grant is credited under 'Other income' and shown on the SoFA.

The total employment costs (Salaries/NIC /Pension) for the Executive Management Team amounted to £393,595 (2020: £415,444). This team is considered to be Key Management Personnel and consists of the Executive Secretary, Head of Finance, Head of Society Business, and the Head of Conference and Building.

The number of employees earning £60,000 per annum or more was:

	2021	2020
	No.	No.
£60,000 - £70,000	2	2
£70,000 - £80,000	1	-
£80,000 - £90,000	-	1
£90,000 - £100,000	1	-

The pension payments for the above members of staff amounted to £61,611 (2020: £46,185). These contributions were paid into a defined benefits pension scheme.

The average number of employees over the year (and full time equivalent) was:

	2020/2021		2019/2020	
	Total	FTE	Total	FTE
Management and administration	14.8	12.4	16.0	12.9
Publishing and editorial	3.0	3.0	3.0	3.0
Total	17.8	15.4	19.0	15.9

14. Pension costs

The Society participates in Universities Superannuation Scheme. The assets of the scheme are held in a separate trustee-administered fund. Because of the mutual nature of the scheme, the assets are not attributed to individual institutions and a scheme-wide contribution rate is set. The Society is therefore exposed to actuarial risks associated with other institutions' employees and is unable to identify its share of the underlying assets and liabilities of the scheme on a consistent and reasonable basis. As required by Section 28 of FRS 102 "Employee benefits", the Society therefore accounts for the scheme as if it were a defined contribution scheme. As a result, the amount charged to the profit and loss account represents the contributions payable to the scheme. Since the Society has entered into an agreement (the Recovery Plan) that determines how each employer within the scheme will fund the overall deficit, the Society recognises a liability for the contributions payable that arise from the agreement (to the extent that they relate to the deficit) with related expenses being recognised through the profit and loss account.

The total movement to the profit & loss account is a loss of £38,952 (2020: loss of £11,719) as shown in note 18.

The latest available complete actuarial valuation of the Retirement Income Builder is at 31 March 2018 (the valuation date), which was carried out using the projected unit method. A valuation as at 31 March 2020 is underway but not yet complete.

Since the institution cannot identify its share of USS Retirement Income Builder (defined benefit) assets and liabilities, the following disclosures reflect those relevant for those assets and liabilities as a whole.

The 2018 valuation was the fifth valuation for the scheme under the scheme-specific funding regime introduced by the Pensions Act 2004, which requires schemes to adopt a statutory funding objective, which is to have sufficient and appropriate assets to cover their technical provisions. At the valuation date, the value of the assets of the scheme was £63.7 billion and the value of the scheme's technical provisions was £67.3 billion indicating a shortfall of £3.6 billion and a funding ratio of 95%.

The key financial assumptions used in the 2018 valuation are described below. More detail is set out in the Statement of Funding Principles.

Pension increases (CPI)	Term dependent rates in line with the difference between the Fixed Interest and Index Linked yield curves, less 1.3% p.a.
Discount rate (f/wd rates)	<ul style="list-style-type: none"> • Years 1-10: CPI + 0.14% reducing linearly to CPI – 0.73% • Years 11-20: CPI + 2.52% reducing linearly to CPI + 1.55% by year 21 • Years 21 +: CPI + 1.55%

The main demographic assumption used relates to the mortality assumptions. These assumptions are based on analysis of the scheme's experience carried out as part of the 2018 actuarial valuation. The mortality assumptions used in these figures are as follows:

Mortality base table	2018 valuation
	<u>Pre-retirement:</u>
	<ul style="list-style-type: none"> • 71% of AMC00 (duration 0) for males and • 112% of AFC00 (duration 0) for females
	<u>Post-retirement:</u>
	<ul style="list-style-type: none"> • 97.6% of SAPS S1NMA "light" for males and • 102.7% of RFV00 for females
Future improvements to mortality	CMI_2017 with a smoothing parameter of 8.5 and a long term improvement rate of 1.8% pa for males and 1.6% pa for females

The current life expectancies on retirement at age 65 are:

	2021	2020
Males currently aged 65 (years)	24.6	24.4
Females currently aged 65 (years)	26.1	25.9
Males currently aged 45 (years)	26.6	26.3
Females currently aged 45 (years)	27.9	27.7

A new deficit recovery plan was put in place as part of the 2018 valuation, which requires payment of 2% of salaries over the period 1 October 2019 to 30 September 2021 at which point the rate will increase to 6%. The 2021 deficit recovery liability reflects this plan. The liability figures have been produced using the following assumptions:

	2021	2020
Discount rate	2.59%	2.59%
Pensionable salary growth	1%	4.2%

15. Fixed Asset Investments

Expenditure	-		(16,000)	
LMS's Contribution to the MARM		-		(10,000)

24. Transactions with Trustees and connected persons

Trustees receive reimbursement only for expenses actually incurred in attending meetings. No remuneration is paid to trustees except as disclosed below. The gross amount that has been reimbursed in respect of attendance of meetings in the period amounted to £7 for 1 Trustee (2020: £12,689 for 19 Trustees).

During the year £450 (2020: £450) was paid to Dr A. Gardiner for delivering Holgate lectures. As this work falls outside of his duties as a trustee, a written agreement was produced between the Society and Dr Gardiner.

As disclosed in the Trustees' Report, where grants are awarded to Trustees the payment is always made to the relevant institution.
