DURHAM SYMPOSIA

The Durham Symposia Committee is now beginning to plan the programme from 1983 onwards. If you have any suggestions for symposia (not necessarily organised by yourself, and not necessarily organised by a member of the Society), or would like any

information about the arrangements, please get in touch with T. J. Willmore or myself, or any other member of the Committee (P. M. Cohn, J. Crank, A. B. Tayler, C. T. C. Wall).

J. R. RINGROSE

FOURTH TOPOLOGY SYMPOSIUM

The Symposium will be held in Edinburgh, 30 June–2 July 1981. It is being organized by J. F. Adams, I. M. James, E. G. Rees, and supported by the London Mathematical Society, Pergamon Press, and the Royal Society.

The programme will consist of ten to twelve one-hour lectures by invited speakers on various aspects of topology, especially

algebraic topology. Those who have already agreed to speak include T. tom Dieck, E. Dror, W. Dwyer, C. McA. Gordon, R. Lashof, J. P. May and R. J. Milgram.

Further details are available from Professor E. G. Rees, Department of Mathematics, James Clerk Maxwell Building, King's Buildings, Mayfield Road, Edinburgh EH9 3JZ, Scotland, U.K.

UNIVERSITY MATHEMATICS TEACHING CONFERENCE 1980

The conference will be held in Nottingham, running from Tuesday, 16 December to Friday, 19 December 1980. As usual, the main work of the Conference will be done in working groups, which will produce reports on the basis of a Brief; each group will work on one of two themes. Plenary sessions will be used to provide information on topics of common interest.

The principal theme this year will be "Adapting the undergraduate curriculum to the needs of society", and the second theme is "Video and microcomputers in undergraduate teaching". Heads of Mathematics Departments in the U.K. have received details of the Conference and are being asked to nominate representatives.

D. SINGMASTER

DURHAM SYMPOSIUM ON OPERATOR ALGEBRAS

A Durham Symposium on Operator Algebras will be held on 27 July–6 August 1981 in Grey College, Durham.

Attendance is primarily by invitation but interested mathematicians who have not

been invited and would like to attend should write to either B. E. Johnson, School of Mathematics, The University, Newcastle-upon-Tyne NE1 7RU, or J. R. Ringrose at the same address.

1981 JUNIOR BERWICK AND JUNIOR WHITEHEAD PRIZES

In summer 1981 the Council will be awarding a Junior Berwick Prize and one or more Junior Whitehead Prizes. Committees will shortly be appointed to consider these prizes.

Meantime members of the Society are invited to submit their views confidentially in writing by 15 February 1981, to the

Council Secretary (the undersigned), from whom the detailed regulations and procedure for the award of each Prize may be obtained. The principal points that members should note are stated in detail in the November *Newsletter*.

D. A. BRANNAN

1980 PRIZES—CORRECTION

Dr. J. T. Stafford and Dr. H. G. Dales have been awarded Junior Whitehead Prizes, not Junior Berwick Prizes as stated in the October *Newsletter*.

CAMBRIDGE ASSISTANT LECTURESHIP

Applications are invited for a University Assistant Lectureship in Pure Mathematics. The appointment will be for three years with a possibility of reappointment for two years. The scale of stipends for persons not ordinarily resident in College is £5,875 rising by four annual increments to £7,555.

Applications with curriculum vitae and

the names of not more than three referees should reach the Secretary of the Faculty of Mathematics, 16 Mill Lane, Cambridge CB2 1SB by 6 December 1980.

Enquiries to Professor J. W. S. Cassels, Head of Department of Pure Mathematics and Mathematical Statistics at the above address (tel. Cambridge 65621, ext. 212).

GROUPS—ST. ANDREWS 1981

This conference is sponsored by the London Mathematical Society and will be held in St. Andrews from 25 July to 1 August 1981. The main topics at the conference will be: combinatorial group theory; infinite groups; general groups, finite or infinite; computational group theory. The main speakers will be Professor J. Neubüser (Aachen), Professor D. J. S. Robinson

(Illinois), Professor S. Tobin (Galway) and Professor J. Wiegold (Cardiff). Further information may be obtained from either of the joint organisers Dr. C. M. Campbell and Dr. E. F. Robertson, Mathematical Institute, University of St. Andrews, North Haugh, St. Andrews KY16 9SS, Fife, Scotland.

PROFESSOR PAUL ERDÖS

The National Academy of Science of the U.S.A. has recently elected Paul Erdős as a Foreign Associate. Professor Erdős is an Honorary Member of the L.M.S.

VISITING MATHEMATICIANS

This list is supplementary to the one published in the October *Newsletter*. A further list will appear next month.

New Books in the
**LONDON MATHEMATICAL SOCIETY
LECTURE NOTE SERIES**

40. Introduction to H_p Spaces

PAUL KOOSIS

An up-to-date exposition of the basic theory of H_p (Hardy) spaces from the concrete point of view. Professor Koosis goes through the classical part of the subject, treating many of its more recent developments and giving new proofs to some older theorems.

Members' Price £7.46

42. Topics in the Theory of Group Presentations

D.L. JOHNSON

These notes comprise an introduction to combinatorial group theory. In this new edition the treatment of a number of topics has been improved and expanded, and there are new chapters on the triangle groups, small cancellation theory and groups from topology.

Members' Price £10.50

43. Graphs, Codes and Designs

P.J. CAMERON and J.H. VAN LINT

This book is concerned with the relations between graphs, error-correcting codes and designs, in particular how techniques of graph theory and coding theory can give information about designs. This book is a major revision and expansion of a previous volume in the series.

Members' Price £6.19

44. $\mathbb{Z}\mathbb{Z}/2$ — Homotopy Theory

M.C. CRABB

This account is a study of twofold symmetry in algebraic topology. The author discusses specifically the antipodal involution of a real vector bundle — multiplication by -1 in each fibre; doubling and squaring operations; the symmetry of bilinear forms and hermitian K -theory.

Members' Price £5.21

Members of the LMS should send their orders, accompanied by the appropriate remittance, to the Science Publicity Controller, Cambridge University Press, P.O. Box 110, Cambridge CB2 3RL.
