

"KCL MathSoc were proud to present our annual weekend conference at Cumberland Lodge, in Windsor Great Park (see <http://www.cumberlandlodge.ac.uk/>), this February. The 2014 meeting ran from the evening of Friday 21st February through to the afternoon of Sunday 23rd February.

Our theme for this year was "Mathematics in the World of Gaming" and we encouraged 30 members of KCL MathSoc to attend the conference to find out more about the various facets of Mathematics in games. This year members had the opportunity to explore the mathematics behind poker games, games cryptographers play, mathematical curiosities, games in computer science and much more.

The programme included several lectures by invited speakers on Mathematics or subjects of interest to Mathematicians, plus various social activities such as debates, quizzes, poker games, and walks in Windsor Great Park"
