

Report on LMS grant for Mirzakhani Society

On Saturday 27th February we held a Varsity event with the Emmy Noether Society of the University of Cambridge. It was a great experience where we were able to discuss the issues surrounding gender equality in maths from a perspective stretching beyond our own Universities. This event involved three speakers, two from the maths department of the University of Cambridge and one from the Isaac Newton Institute. We also were able to explore Cambridge. The LMS grant was used to cater this event for our members.

We'd like to take this opportunity to thank the LMS for the grant, it was much appreciated.
