London Mathematical Society Undergraduate Research Bursaries in Mathematics Guidelines 2020

These guidelines describe the **London Mathematical Society Undergraduate Research Bursaries in Mathematics** and are for the 2020 round only. Please read the information provided on the website and these guidelines before making an enquiry or completing an application form.

This information can be downloaded from <https://www.lms.ac.uk/grants/undergraduate-research-bursaries/applications>

The closing date for receipt of applications is 1 February 2020.

Nature of Awards

The purpose of the awards is to give experience of research to undergraduates with research potential and to encourage them to consider a career in scientific research.

The awards provide support for the student at a rate of either £215 per week (for bursaries held at universities based outside London) or £225 per week (for bursaries held at universities based in London), for a period of between 6 and 8 weeks. The London Mathematical Society does not pay overheads and does not offer research expenses except in exceptional circumstances. The bursaries produce no National Insurance contribution liability.

Eligibility

- Students may only take up the award during the summer vacation between the **intermediate years (i.e. 2/3, 2/4 or 3/4)** of their undergraduate degree. Students in the final year of their degree intending to undertake a **taught Masters** degree immediately following their undergraduate degree may apply. Applications on behalf of first-year undergraduates will **not** be considered.
- Researchers in Mathematics at universities and research institutions within the UK are eligible to apply. Interdisciplinary projects will be considered providing the project has significant mathematical content.
- **Postdoctoral researchers** and **new lecturers**, early in their careers are also encouraged to apply, and should note this on the application form.
- Only **one** application should be submitted by a supervisor.
- Departments are asked to provide **match-funding** for half of the grant awarded (for example, for a 6 week grant at £215 per week, departments will be asked to contribute £645 and the Society will contribute £645). Departments offering match-funding will be able to receive funding for up to 4 half-funded Bursaries. Departments not willing to provide match-funding will only be able to receive funding for up to 2 Bursaries. Please bear in mind that this is a national scheme with a limited number of bursaries.
- **Mature students** are eligible to apply, but must not have a previous degree in any subject.
- Students will normally be expected to be on track for a first class degree in order to be considered.
- Students must be registered at a **UK institution** for the majority of their undergraduate degree.
- Supervisors and students do not necessarily have to be based at the same institution, however we expect that they will work together at the same institution for the duration of the project and have regular meaningful personal contact (an average of 1 hour per week meeting in person is the minimum expected).
- Bursaries will **not** be awarded for projects that are a **part of degree work**, or that take place overseas for more than 50% of the project time.

- Bursaries will only be granted for the student named on the application form; awards are not transferable between students.

Adjudication

Adjudication will be by the Early Career Research Committee of the London Mathematical Society, advised by independent expert referees. The scheme is competitive and applications will be judged primarily on the quality and merits of the student, as well as the mathematical merit of the project and the experience the student will have whilst working on it. Preference will be given to:

- Students who are expected to achieve a first class degree, who are considering a career in research, but who have not yet had an opportunity to experience research.
- Research projects that have a clearly defined objective which is achievable by the student in the time available.
- Projects which give scope for thought and initiative on the part of the student and do not use the student as a general assistant.

How to apply

The application must be made by the person who will supervise the research and not the student. However, supervisors should discuss the project in detail with the nominated student who should also contribute to the project design. The application form includes space for CV information for the nominated student and a supporting statement from the student's academic tutor. **These should be included in the form and not attached separately.** Applications must be made using the application form for 2020 which can be downloaded from the London Mathematical Society's website – <https://www.lms.ac.uk/grants/undergraduate-research-bursaries/applications>

Awards are not offered directly to individual researchers but to the institutions to which they belong. By signing the application form, the Head of Department signifies their willingness for the award to be administered by their department, and agrees to the Conditions of Award and reporting requirements of the scheme. Departments are asked to provide match-funding for half of the grant awarded (for example for a 6 week grant at £215 per week, departments will be asked to contribute £645 and the Society will contribute £645). Departments offering match-funding will be able to receive funding for up to 4 half-funded Bursaries. Departments not willing to provide match-funding will only be able to receive funding for up to 2 Bursaries.

Awards are made formally to the institution on the understanding that the research complies with the safety and ethical regulations of the institution and that the institution will ensure that the requirements of all relevant regulatory authorities will be met before the work commences.

The closing date for applications is 1 February 2020 and all applications will be acknowledged by e-mail to Supervisors. Decisions will be communicated to Supervisors during May 2020. If necessary the bursary administrators can be contacted on urb@lms.ac.uk.

If you **need to withdraw your application**, you must let us know as soon as possible on the email above. Please bear in mind that we are a small central team and that processing each application takes time. If you receive alternative funding for your project, please let us know immediately so that, if necessary, we can re-allocate our funds accordingly. We receive many more good applications than we can fund, so please help us to use our resources in the most effective way.
